Soongsil University, founded in Pyongyang in 1897, was accredited as the first four-year college in Korea. Since then, the school has produced many leaders who took the lead in the national independence movement, modernization and missionary work. In 1938, the school decided to close down voluntarily in protest against forced worship at Japanese shrines. In 1954, Soongsil university was reopened not in Pyongyang, but in Seoul, the capital city of Korea, owing to the division between the two Koreas after the liberation. The graduate school of Soongsil university was founded in 1972, as an effort to advance the grounding principle of Soongsil University, 'Truth and Service.' This principle is based on christianity spirit, encouraging the students to follow the footsteps of glorious tradition of Pyongyang Soongsil and to take representing roles of Christians in our society. Our educational goal is to produce talented people who have an academic speciality and originality by researching profound academic theories and practical applied methods, and thus produce well-rounded leaders who are equipped with personalities and abilities.

The graduate school of Soongsil university has been trying to extend academic collaborations with other graduate schools in and out of the country. Since the graduate school consortium with Chung-ang university and Inha university initiated open credit exchange programs in 1975, we have been making a contribution to academic research and the development of local community. Furthermore, we have built up lots of academic partnerships with leading universities all around the world in order to provide students and faculty members with various exchange programs.

[Message of the Dean]

I promise that we will continue to make more efforts for bridging the gap between the fields of studies as well as for identifying our school in a more unique way. The graduate school of Soongsil university is dedicated to offering the talented people many opportunities to challenge the present and to lead society into its promising future.

Now, we are facing the 21st century, the time for new challenges and opportunities given in the midst of information. I am sure that the chance will be given to a person who may hold the key without being drifted in the sea or buried in the midst of information. Our school is well prepared for admitting prospective students who want to go forward and upward in society by taking these challenges and opportunities. Moreover, we do our best to provide students with the best educational conditions and research environments, indispensable for becoming prominent experts in their fields.

I hope you will join us at the Graduate School of Soongil University and pour out your passion into your vision for the future.

Ha, Jung Shik
Dean of Graduate School

Chronology of Soongsil University

Soongsil College 1897~1980

Oct. 1897

Dr. W. M. Baird, a missionary of the Northern Presbyterian Church of America, started a school in his residence in Pyongyang, as the school's principal.

Sept. 1905

The school was divided into a high school and a college, and named "Soongsil Junior High School" and "Soongsil College," respectively.

March 1912

Soongsil received official authorization from the government to be the first college in Korea. Many of Soongsil's faculty and students were imprisoned for participating in the Incident of 105 Activists. The Southern Presbyterian Church Mission of North of America became involved in Soongsil's administration.

April 1915

R. O. Reiner was inaugurated as the principal of Soongsil.

March 1938

The school was shut down as the result of its refusal to visit and worship at Japanese shrines.

April 1954

Soongsil was reestablished in Seoul after 16 years of shutdown. The following departments were set up: English Language and Literature, Philosophy, History, Law, and Economics.

May 1954

Rev. Hahn, Kyung-Jik was inaugurated as dean of Soongsil, and Dr. Bae, Min-Soo was chosen to serve as the chairman of the board of directors. The school opened using part of Yongnak Church Building as its classrooms.

June 1957

The school was moved to the new campus in Sangdo-Dong, Dongjak-Gu, Seoul. Dr. Kim, Hyung-Nam became the chairman of the board.

Jan. 1971

Soongsil was combined with Daejun College to form Soongjun University.

Jan. 1972

The Graduate School was established. Hwang, Heui-Young was appointed as the first Dean of Graduate School.

Soongsil University 1981 ~ Present

Oct. 1983

The Graduate School of Small and Medium Business was established for the first time in Korea. Soongsil University became two separate universities, Soongsil and Daejun.

March 1987

The school decided to take the previous name of the school, "Soongsil."

Nov. 1987

The Graduate School of Information Science was established, the first of its kind in Korea.

Nov. 1988

The Graduate School of Labor and Industrial Relations was established, the first of its kind in Korea.

Nov. 1991

The Graduate School of Unification Policies was established, the first of its kind in Korea.

March 2005

Lee, Hyo-Gae was inaugurated as the eleventh President of Soongsil University.

April 2005

Mutual Agreement for Dual Master Degrees of Chinese Literature between Soongsil University and Tianjin Normal University in China.

March 2006

Kim, Dae-Keun was appointed as the eighteenth Dean of Graduate School.

June 2006

Mutual Agreement for Dual Degrees of the Master Programs between Soongsil University and Yanbian University in China.

March 2008

Lee, Jung-Jin was appointed as the nineteenth Dean of Graduate School.

Aug. 2008

Department of Culture Contents was established.

March 2009

Kim, Dae-Keun was inaugurated as the twelfth President of Soongsil University.

March 2009

Lee, Sang-Won was appointed as the twentieth Dean of Graduate School.

March 2011

Ha, Jung-Shik was appointed as the twenty-first Dean of Graduate School.

March 2012

Program in Korean Studies and Program in Sports Information Technology was established.

Logo of Soongsil University

송실대학교

S O O N G S I L
U N I V E R S I T Y
1 8 9 7

The logo of Soongsil University is based on the two "S"s contained in its name, "Soongsil." The two "S"s in the logo signify the meeting of the Daedong and Han rivers. The Daedong River flows in Pyongyang, the capital of North Korea, where Soongsil was founded. The Han River flows in Seoul, the capital of South Korea, where the present Soongsil is located. Through the curved figure of the "S" in the logo we intend to express one large flowing river which is a metaphor of our aspiration for the unification of North and South Korea, like two rivers being combined into one large stream. As in the strong flows of a large river, the "S" in the logo emphasizes Soongsil's preparations for the future of a united Korea.

The active and dynamic impression provided in the space division of the badge represents Soongsil students' openmindedness and the coexistence of their diverse thoughts. The calligraphies of "U" and "I" in the logo represent computers, books, and test tubes signifying Soongsil's pursuit of academic excellence.

Symbols of Soongsil University

The White Horse

Soongsil, which was originally founded in Pyongyang, sought to inherit the frontier spirit of the ancient Kokuryo people, who conquered Manchuria and dashed through the fields on horseback, wielding their mighty power. The white horse also symbolized the school's yearning to reach God's kingdom in heaven: "And I looked, and behold, a white horse, and he who sat on it had a bow; and a crown was given to him; and he went out conquering, and to conquer" (Revelation, 6:2). The rip in the middle of the White Horse statue on campus symbolizes the 16 years that Soongsil was shut down by the Japanese colonial government.

The Tulip Tree

The tulip tree grows tall and is known for its beautiful bell-shaped flowers which are never worm eaten and always remain clean. This cleanliness symbolizes Soongsil's integrity that has been maintained throughout its 113-year history. This tree can be easily spotted on the Soongsil campus, but it is rare in other places.

Humanities & Social Science

Humanities & Social Science

Department of Korean Language and Literature

With the Christianity spirit based on the School's founding and disciplinary motto, Truth and Service, the Department of Korean Language and Literature aims to foster human resources who have useful knowledge and sincere personalities contributing to the community, and also cultivate talented people who can show the originality and creativity of Korean in the global culture. The Department of Korean Language and Literature guides students to perform more professional studies based on their academic capacities from undergraduate courses. We provide students with a high-quality academic environment so that they will get internal and external academic development through finding their own creative fields.

AREAS OF SPECIALIZATION

Details of major Korean Language, Korean Classical Literature, Korean Modern Literature is divided into parts. Undergraduate courses specialize in knowledge-based professional studies, encouraging highly academic research skills and a creative culture both inside and outside the academic discipline.

PROGRAM OF STUDY

Teaching is by a variety of lectures and seminars. Assessment is by written examination, assessed coursework, presentation, and a dissertation. In addition, literary Soongsil Research Conference held twice a year to date has been continued.

Department of English Language and Literature

Department of English Language and Literature is home to one of the oldest and most distinguished English programs in Korea with a long tradition of excellence in English literature and English linguistics. The department currently offers three different types of degree programs: MA, MA/PhD-combined, and PhD. All these programs provide two areas of specialization: English Literature and English Linguistics. The department has a small and intimate community, yet provides an active and stimulating environment for graduate studies. Two in-department conferences are organized annually, specifically for graduate students to present their term projects or personal work and gain valuable presentation skills. Quality courses are offered and the faculty have attracted domestic and international students. As a result, all the courses at the department are provided in English. Currently, about half of the student body are international students. Graduates from the department find numerous teaching opportunities, full-time and part-time, at various levels of universities throughout the country.

AREAS OF SPECIALIZATION

Department of English Language and Literature provides two areas of specialization: English literature and English linguistics. For the literature majors, the department offers various courses of poetry, novel, drama, criticism, and theme-based studies. These courses will help students broaden critical discernment by cultivating literary sensitivity on the basis of understanding and analyses of literary works from Old to Modern British and American literature. Furthermore, recent theories on literary criticism will provide students with opportunities to the current tendency of contemporary literary studies.

The English linguistics track pursues theoretical and applied studies in English. Theoretical studies include phonetics, phonology, morphology and syntax and applied studies cover a wide variety of language-related themes, from sociolinguistics and discourse analysis to language acquisition and ESL/EFL policies. Notwithstanding this categorization of theoretical vs applied linguistics, the basic attitude toward English linguistics within the department is one of inter- and multi-disciplinary approach. The curriculum is also sensitive to current theoretical development in theoretical and applied linguistics, including, but not limited to, corpus linguistics.

PROGRAM OF STUDY

As the department is by now fully globalized in terms of curriculum and student composition, all the lectures within the department are delivered in English with a minimum use of Korean. Evaluations are administered in many different ways depending on specific courses and subjects. Basically, students are required to make some in-class presentations and/or to submit term papers. Some courses demand a considerable amount of reading, intensive or extensive, while others assign a fair amount of problem-solving homework.

Department of German Language and Literature

01

Humanities & Science

The goal of the Department of German Language and Literature is to offer training in academic theories of German literature and linguistics and their applications at a profound level. The department also seeks to nurture talented students who will make contributions to the study of German Language and Literature by enhancing leadership and creativity in the field. In the era of globalization, cultural exchange between Korea and Germany is at a turning point. The department aims to educate specialists to work in German-speaking regions and to foster the development of relationships between Korea and German-speaking countries and to enrich Korean culture through cultural exchange.

AREAS OF SPECIALIZATION

German Literature
German Linguistics

Department of French Language and Literature

The program in French Language and Literature seeks to guide students in professional research in their chosen fields of specialization. It also aims to enhance students' ability to pursue their studies on the basis of a broad knowledge of the French language and literature acquired through their undergraduate training.

AREAS OF SPECIALIZATION

French Literature
French Linguistics

PROGRAM OF STUDY

MSc in Economics, MSc in Financial Economics

This degree provides a foundation in modern techniques of quantitative economics analysis and econometrics, for graduates with degrees in quantitative economics or science-based subjects, mathematics or statistics. The central feature of the course is its blend of core economic concepts and principles with the modern research methods required for their application.

Department of Chinese Language and Literature

01

Humanities & Science

The Department of Chinese Language and Literature aims to educate researchers who will contribute to the development of Chinese studies at home and abroad, to train professional translators who will directly join cultural interchange between Korean and China, and to foster international thought through a joint degree acquisition system with universities in China.

AREAS OF SPECIALIZATION

Chinese Linguistics

The elective courses of Chinese linguistics are designed to introduce students to the basic concepts in the field of Chinese linguistics, including phonology, semantics, morphology syntax and pragmatics. Theoretical and applied linguistics are also offered so as to enhance students analytical and practical skills in carrying out in-depth research.

Chinese Literature

Courses for Chinese Literature are Chinese culture, History of Chinese Learning and Thought, Confucian Classics and Pre-Qin Chinese Thinkers to study a background of Chinese learning and Chinese culture, Classical Chinese literature, Studies in Modern Chinese Literature, Chinese Literary Criticism, Studies in the Theory of Chinese Literature and Methodology of Chinese Literary Research to improve overall understanding of Chinese culture and a criticism ability. Moreover, Chinese Literature Course offers 15 various lectures such as Studies in Chinese Poetry, Studies in Chinese Prose, Studies in Chinese Novel and studies in Chinese Drama to study the stylistics in China according to their literacy style, and students can study wide and deep basic academic research.

Korean-Chinese Translation Study

To foster a Korean-Chinese Translator, Korean-Chinese Translation Study offers Chinese training courses such as Chinese Translation, Chinese Interpretation, Practicums in Chinese-Korean Translation and Practicums in Korean-Chinese Translation to improve translation skills of spoken language and writing, and also offers Introduction to Translation, Principles & Theories of Translation in East Asia. A well-balanced study in two fields is also available in courses such as Translation and Interpretation Linguistic ability improvement and Principles & Theories of Translation.

Comparative Study of Korean-Chinese Linguistics & Literature

There are two kinds of major fields in comparative study Korean-Chinese Linguistics & Literature, Firstly, Comparative Study of Korean-Chinese Linguistics & Literature opens Introduction to Comparative Literature. Theory and Methodology, Comparative Study of Korean-Chinese Modern Literature examines theoretical basis and methodology of comparative study, and also opens comparative classes of poetry, prose, novel, folk literature, and film. It is designed so students can systematically study Korean-Chinese Translation Study.

PROGRAM OF STUDY

Chinese Language and Literature graduates usually enter four fields of work: teachers in secondary and high education institutions, professors and professional scholars as Chinese literature educators, someone in charge of translation work in companies, and someone in charge of publishing cultural work and education related with Korean-Chinese two-way language translation and interpretation work. Especially, we encourage balanced study by taking at least two lectures from each field by stressing Korean-Chinese two-way language abilities. Moreover, students who major in translation study and comparative study, have to take more than 75% of credits in two areas, Chinese Linguistics and Chinese Culture. We believe that students can improve overall basic knowledge in Chinese language and literature and two kinds of language abilities if they take more advanced classes. To do this, we guide students to take credits through academic workshops by registering for courses in the first semester, to run self-control study groups studying a required reading list, and to build systematically educational courses which test major abilities through graduation exams.

Department of Japanese Studies and Linguistics

The Department of Japanese Studies and Linguistics aims to contribute to the development of the relations between the two countries, Korea and Japan, and cultivate experts who can properly analyze and evaluate Japan in the times of globalization. We offer three fields of specializations, Japanese Linguistics and Culture and Japanese Economy and Business Management. Eventually, we hope to understand Japan better than before by widening our intellectual horizon about Japan and by acquiring academic research abilities in the field.

AREAS OF SPECIALIZATION

Japanese Linguistics

Japanese Linguistics aims to foster the next generation equipped with a broad knowledge in Japanese linguistics by training them with basic skills required for researches in the field and work towards the development of Japanese linguistics.

Japanese Literature and Culture

Japanese Literature and Culture offers general studies in Japanese literature and culture and fosters experts who can contribute to the advancement of our culture through cultural communication between the two countries.

Japanese Economy and Business Management

With rapid progress of globalization and the Information age, Japanese Economy and Business Management helps to understand better the commercial relationship between Korea and Japan in order to meet social demands, through learning about multilateral analysis methods for Japanese enterprise business.

PROGRAM OF STUDY

Most of the classes are taught in the form of seminars in which students investigate research materials by themselves and present the results in class. With the help from professors, students will be able to find creative ways to approach current issues in the field of Japanese literature and linguistics and therefore perform scientific studies based on objective data and supporting theories.

Department of History

01

Humanities & Science

The curriculum of the History Department is divided into four fields : Archaeology & History of Arts, Korean History, Eastern History, and Western History. The graduate programs of the History Department are aimed at training students to be professional historians in each of these four fields. To achieve this goal, the History Department provides graduate students with intellectual training with a special emphasis on the analysis of primary sources in each field and the survey of the recent historical research. It also places a great deal of weight on basic practices such as studying the structures of histories, examining the situations of primary sources, and surveying the main issues in each field.

AREAS OF SPECIALIZATION

Archaeology and History of Art

Archaeology and History of Art studies the academic basis necessary to restore culture and society built up by human beings from their emergence to the present-day, and focuses on the special characteristics of the change in culture and society in each age.

Korean History

Korean History aims to study the academic basis necessary for students who major in the history of our nation and to raise insights about a realistic society and proper recognition of history. To do this, students are encouraged to understand the characteristics and problem in each age through lectures such as an era exercise in each period from ancient times to the present, and develop abilities in decoding historical records and characters through reading manuscripts with comments and locating historical sites.

Asian history

Asian History helps students understand the traditions and stream in Asia by researching many areas, especially Chinese and Japanese history, and also world history by taking a look at the position of Korean history and culture in Asia and its relationship to Western history.

Western history

Western history provides students with an understanding of the characteristics of culture and history in Western society and the meaning of world history, and also raising a balanced point of view and objective cognitive power by taking a look at subjects including the relationship between Western culture and history. Critical review of Western history by periods and by regions makes

Department of History

students improve their understanding of the dynamic development of Western culture and develop a creative historical thinking power.

Department of Lifelong Education

The Department of Lifelong Education began offering a Master's degree program in Lifelong Education in 2003, and Ph.D. programs for professionals in Lifelong Education and HRD(Human Resource Development) in 2004, and for officials and educators in Lifelong in 2006. These Ph.D. programs were the first of their kind in Korea. The University's efforts to study and implement lifelong education, perceived worldwide as a revolutionary form of modern education, began with the establishment of a 4-year undergraduate course in 1998, and with the addition of Master's and Doctorial programs, has established Soongsil University as a leader in the study of lifelong education in both Korea and Asia.

The primary goal of the Department of Lifelong Education is to provide educational programs for the development of specialists and practitioners in the field of lifelong education and HRD. These programs will especially suit those students who wish to take up positions as lecturers and instructors in universities and other institutions of higher education that deliver programs in the field, as HRD specialists in research and development institutes and post-secondary education, as HRD specialists in private corporations, and as associate and senior managers responsible for the supervision of lifelong educational institutions including those providing distance education.

AREAS OF SPECIALIZATION

Lifelong Education

PROGRAM OF STUDY

The Department of Lifelong Education uses a variety of teaching methods such as seminar, lectures, PBL(Problem-Based Learning), e-Learning, blended learning, and workshops to achieve the educational goals of the program. Each course requires specific learning outcomes resulting from a number of class activities to achieve its educational goals and objectives through the course. These learning outcomes are assessed fairly based on objective evaluation criteria. The purpose of assessment is to help learners' academic progress, as well as evaluate the quality of the outcome.

Department of Creative Writing

01

Humanities & Science

Department of Creative Writing, opened in 1998, continues a tradition aimed at the promotion of culture. Department of Creative Writing covers a wide range of traditional literature including poems, novels, plays and creative prose. Considering the 21th century information society and media industries requiring a variety of creative content, the definition of literature now covers letters, videos, and also communication channels.

AREAS OF SPECIALIZATION

Creative Writing

PROGRAM OF STUDY

The curriculum largely focuses on poems, novels, criticism, and drama. Learning methodology through courses as well as basic theory is mainly based on practical and creative writing classes. Practical lessons for students to submit work freely with the professor with analysis, and discussions, are offered in a seminar format.

Department of Christian Studies

General Introduction of department

- An advanced program of exploring Christianity from an interdisciplinary methodology
- A excellent faculty that provides a variety of classes and seminars
- A pioneering graduate study that enriches Soongsil's Christian identity

AREAS OF SPECIALIZATION

Christian Theology

This area is divided into the subsections of reformed theology, evangelical theology, spiritual theology and contemporary theology. This area aims to reflect the main contents of Christian Faith, Christian church and theological development, and current streams of Christian thoughts in terms of postmodern situation, by coming back to the Reformation tradition.

Christian Philosophy

This area is divided into subsections of hermeneutics and contemporary Christian philosophy, contemporary hermeneutics, and outstanding reformed philosophers, by coming back to the philosophers who really loved God, such as Paul Ricoeur, Nichoals Wolterstroff, and Alvin Plangtinga.

Christian Historical Studies

The department's Christian historical studies field emphasizes 'History of Christian Explanation and Interpretation' in addition to textual criticism.

Christian Cultural Studies

The department's Christian cultural studies field is designed to study a variety of cultural phenomena from a Christian perspective.

Biblical Studies

Biblical Studies concentrates on both the Old Testament and the New Testament with special attention to their relevance to Christian faith life and Christians' culture-transforming task as well. This major is divided into Old Testament studies and New Testament studies, which focuses on the Old Testament and the New Testament, respectively. Overall, Biblical Studies with all its specific course works and other trainings is designed to train students enough to proclaim and preach the Bible in both essential contexts and academic settings.

Christian Sociology

Christian Sociology is an applied social science that interprets individual and social text through the eyes of Christian faith.

Christian Ethics

The aims of Christian Ethics is to provide the systematic study of the way of life exemplified and taught by Jesus Christ so that students are encouraged to apply it to the various demands and decisions of human existence.

Christian Counseling and Psychology

The Christian Counseling and Psychology is interested to research and teach the latest theories in counseling in order to bring up the counseling specialists needed for the field of counseling and psychology on the basis of the wide understanding of modern society and human beings. For this purpose, by coordinating the research work, practicum and counseling specialist internship of students. Christian counseling and psychology field are specialized. Also, it aims at making students able to do continuous research and counseling practice as counseling specialists needed for this age through understanding the need for counseling in the counseling field and society generally.

PROGRAM OF STUDY

Class lecture and presentation, group research, site visit and counseling, sociological fieldwork etc.

- **Yon Gyong Kwon** : Pauline Theology, Biblical Hermeneutics, New Testament Theology, New Testament Ethics, eschatology
- **Seung Min Park** : Counseling for Adolescents, Christian Counseling and Psychology, Spirituality and Psychotherapy, Prevention & Counseling on Internet Addiction

Department of Law

01

Humanities & Science

Founded in 1972. Department of Law at Soongsil University is devoted to fostering social leaders such as superior social workers, scholars, and lawyers. The first Ph.D. was awarded to the first dean of the School of Law of Soongsil University serving from March 1955 to Feb 1959. Also, Bang, Soon-Won, Justice of the Supreme Court and a former professor of the School of Law was granted an honorary Ph.D., and Park, Song-Kyu, a pre-conductor in the office of Legislation, and Choi, Yong-Choon, a professor of Sangji University, were also granted of law in 1989. All of our alumni play pivotal roles in all levels of society.

AREAS OF SPECIALIZATION

Basic Law, Constitution Law, Administrative Law, Criminal Law, Criminal Procedure Law, International Law, Labour Law, Civil Procedure Law, Civil Law, Commercial Law, American Law

In the 21st century, heading for an affluent society established on rapid industrial developments, high quality experts equipped with creativity and responsibility are expected to perform various social activities. The Department of Law educates students in profound knowledge based on our school's Christian spirit and educational ideals, which is necessary for qualified leaders as well as experts in law and legal studies by researching the theories and practices related to law.

PROGRAM OF STUDY

Program is available in a variety of lectures and seminars. Assessment is by written examination, assessed coursework, presentation, and a dissertation. The percentage of the final grade awarded for the continuously assessed component varies across courses.

Department of Social Welfare

The Department of Social Welfare was founded based on the spirit "Truth and Service", and aims to educate students to be equipped with the required values to become a social worker based on studies of related theories and practices, and to train their professional abilities to adapt to overall social welfare practice fields. As the department of Social Welfare fosters social workers who have a sense of duty and expertise in social welfare practices, students are expected to perform researches based on scientific theories and detailed practical experiences upon their graduation.

The Department of Social Welfare was ranked very high in the 2004 national for departments of Social Welfare in various evaluation categories. It is ranked 2nd in the category of Professors' reputation and graduates' reputation in Korea, and 3rd in the category of educational environment.

AREAS OF SPECIALIZATION

Social Work Practice

Social Work Practice is specialized in nurturing professionals equipped with clinical practical ability by researching and investigating social welfare values, theories, practice ways and skills in the social welfare practice field.

Social Welfare Administration

Social Welfare Administration develops students' lead improvement in quality of social service through understanding theories of social service delivery system, running human service organizations, acquiring resource development skills, and developing programs and evaluation.

Social Welfare Policy

Social Welfare Policy is for someone who wants to understand required theoretical knowledge necessary to establish, analyze and estimate social security, medical security and social welfare service, and learns practical ways of utilization in various macroscopic dimensions.

PROGRAM OF STUDY

The Department of Social Welfare offers three specialized areas of study. Clinical Social Work, Social Welfare Administration and a Social Welfare Policy based on broad humanities and social science knowledges acquired through the first two years. Based on the completion of these core courses and learning more about social welfare values and professional knowledge and skills, the Department of Social Welfare makes an effort to foster social welfare clinical social workers who can offer social welfare services to individuals, families, small groups, and local societies in public and private fields, and experts who can have an effect on social welfare policy making process and its evaluation. Especially, reflecting on the educational motto of Soongsil University. "Truth and Service", we cultivate devoted social workers who have a voluntary spirit supported by Christianity.

Department of Public Administration

01

Humanities & Science

The major goal of the Department of Public Administration is to educate students to make them equipped with adequate skills and competence required in this global and digital world, under Soongsil University's founding philosophy of "Truth and Service." The program, in particular, aims to achieve the following objectives: First, to upgrade students' ability to do research and teach in the field of public administration and policy; Second, to produce graduates qualified for both public institutions and state-owned enterprises; Third, to enable students to play a role as leaders in private sectors; Fourth, to encourage students to join international administrative institutes such as the UN, UNDP, WTO, etc. The faculty of the Department are made up scholars who have various academic and practical backgrounds. The Department of Public Administration ranked seventh in research works per a professor as evaluated by the Joongangilbo in 2005. Specialized fields of Department of Public Administration are Information, Evaluation and Urban Policy.

AREAS OF SPECIALIZATION

Public Administration

Public Administration aims to cultivate the next academic generation and to foster high-class managers in charge of administration of organizations including national and local governments, and public enterprises and offers fourteen courses.

Public Policy

Public Policy aims to cultivate policy-making experts in each field in order to correspond to complicated and diverse administrative demands and offers fourteen courses.

PROGRAM OF STUDY

Considering characteristics of policy-making which need experimental analysis about social phenomena, we offer seminars, presentations, and lectures focusing on theories. In case of need, we invite outside experts to raise understanding of practical aspects in the field. To achieve the founding idea of the school motto, "Truth and Service", professors and graduate students jointly take part in some voluntary works such as Habitat and open workshops joining with undergraduate students, graduate students, and other graduates.

Department of Political Science and International Relations

The Department of Political Science & International Relations aims to cultivate professional human resources who construct a democratic civic society and contribute to national unification. To accomplish this, the Department of Political Science & International Relations educates students from wide and realistic perspectives to have more specified policy-planning abilities based on firm theoretical backgrounds.

AREAS OF SPECIALIZATION

1. Unification & North Korean Studies
2. Korean Politics
3. Comparative Politics
4. International Relations
5. Political Theories/Political Thoughts

PROGRAM OF STUDY

Teaching is by a variety of lectures and seminars. Assessment is by written examination, assessed coursework, presentation, and a dissertation. The percentage of the final mark awarded for the continuously assessed component varies across modules.

Department of Information Sociology

01

Humanities & Science

The Department of Information Sociology cultivates human resources who can lead the quickly changing Information society through specialized education programs guided by the best faculty members among the Departments of Information Sociology in Korea.

AREAS OF SPECIALIZATION

We actively cope with market demands through building cooperative relationships with Internet companies and institutions. We also focus on cultivating talented people who can be active as leaders in society equipped with the understanding of fundamental flows in macroscopic nation's policy.

PROGRAM OF STUDY

By offering seminars where students can freely run courses with active debate on subjects, we are sure that they will acquire how to utilize academic knowledge by themselves. Moreover, we set a goal of training professional researchers who can figure out a problem and find a systematic solution to given problems by taking basic course including various methodology classes for effective analysis of real society phenomenon and by studying further to expand their capacities as professionals.

All courses are electives.

Department of Business Administration

01

Humanities & Science

Department of Business Administration inherits the glorious traditions of Soongsil university, cultivating talented and honest volunteering leaders. By teaching professional Knowledge through lectures, seminars and the sincere attitudes of students, the Department of Business Administration fosters superior human resources who can contribute to social development and national profits. The department practices detailed plans for the future as follows in areas of specialization.

AREAS OF SPECIALIZATION

Organization and Human Resource Management

In the age of limitless competition in the 21st century, one of the most important properties are human resources. Previously, tangible values such as industrial competition, and material and financial resources had been regarded as the origin of competition. However, in the age of recent knowledge competition, intangible values such as knowledge, skills, abilities, and experiences acquired by human resources are regarded as the source of competition. Thus, this area focuses on educating management methods and related theories which can research and develop human resources. Moreover, this area helps students to learn the way to strengthen competitiveness by utilizing people who are qualified and able to figure out things needed to achieve the goals of each corporation.

Financial Management

Modern finance is a high-tech industry, requiring more sophisticated quantitative tools to assess and manage risks and returns. This program is intended to prepare students for a wide range of careers both inside and outside the financial industry, including corporate finance, financial engineering and risk management, quantitative asset management, macroeconomic and financial forecasting, quantitative trading, and other applied research positions. Although the program does not require prior work experience in finance, students are encouraged to be exposed to finance-related fields. The program is also appropriate for engineers, mathematicians, physicists, computer programmers or other high-tech professionals seeking a career change into the finance world.

Marketing

Marketing is a way of life in a sense. Marketing is a broad field entailing a wide variety of tasks involving activities to build customer relationships by delivering customer value. However, the power of marketing comes through integration: putting all elements related to individuals or social

Department of Business Administration

life at the heart of the consumption process. In order to achieve this, the marketing curriculum consists of marketing courses designed to deliver the disciplinary fundamentals for success and the research excellence that advances business knowledge. There are many courses in marketing, such as advertisement media planning, service marketing, sports marketing, marketing research, and consumer behavior. These courses in marketing provide the professional preparation needed for a variety of business and management careers.

OMIS

This area provides a foundation in modern techniques of Operation Management and Management Information Systems for graduates with degrees in business administration and other related areas. The central feature of the course is its blend of core management practical concepts and principles with the modern research methods required for their application in business administration areas.

PROGRAM OF STUDY

- 1) By offering advanced theory courses in each specialized field, we teach theories and practical methods related to Business Administration, and guide students to contact with more profound theories and new approaches, so that they can write theses at a superior level which can be acknowledged in research seminars as well as in the academic society.
- 2) We focus on cultivating practical abilities with the priority of theoretical and practical management methods so that students can compete in the global information age. To achieve this goal, a variety of programs including practice applications, example studies, business games, group studies, CEO invitation lectures, and industrial-educational cooperation are offered to students.

DEPARTMENTAL REQUIREMENTS

Master's Degree Program

1st Semester : Principles of Accounting / Principles of Business Administration / Korean Language

2nd Semester : Statistics / Marketing (Courses for International Students) / Financial Management
(Courses for International Students)

3rd Semester : Research & Survey Methods / Organization and Human Resource Management (Courses for International Students)

4th Semester : Major Courses

Doctoral Degree Program

All courses are the same as those for Korean students.

Research & Survey Methods is a mandatory course for all students and that course will be offered every semester.

The doctoral program consists of course work and a thesis. The course will be given either as a series of lectures or seminars.

Assessment will be processed by written examination, coursework assessment, and a dissertation. During the course work, the Ph.D candidates propose their thesis topics. After finishing the fourth semester and passing a written examination, the Ph.D students can go forward to write their thesis. The thesis should be accepted by the thesis committee.

In this day and age, an economic way of thinking must be ubiquitous for competitive modern organizations to survive. Reflecting this strong trend, institutes (firms, administrative bureaus, research institutes, and the judiciary to name a few) are increasingly demanding expert human resources highly trained in economics. The graduate program in the Department of Economics at Soongsil University has swiftly responded to such social requests, developing proper academic tracks and associated curriculum. In particular, the economics program at Soongsil emphasizes the applicability of economic training on various urgent real-world tasks. Furthermore, the faculty members have been evaluated to be highly qualified to support this program. In October, 1996, Soongsil's Economics Department was ranked sixth in the Joongang Ilbo newspaper's rating. In the second Joongang Ilbo rating of 2001, Soongsil was ranked sixth again in the overall category, and was ranked first in the category of faculty research performance. Recently, nationwide rating by the Korean Council of University Education in 2004 revealed that Soongsil's economics program belongs to the "Most Excellent Group" (within top ten percent in research) in Korea.

AREAS OF SPECIALIZATION

Ph.D. PROGRAM

Our Ph.D. program focuses on a solid core curriculum in economic theory and econometrics. Beyond this, we offer a number of specialized fields of study:

1. Financial Economics and Macroeconomics
2. Law and Economics and Public Economics
3. Economic History and Economic Systems
4. Labor and Personnel Economics
5. Econometrics
6. Applied Microeconomics: industrial organization and game theory, environmental economics, international trade and so on. The program is designed to prepare students for careers in consulting, domestic and multinational firms, and research institutes and provide students with university-level teaching experience.

M.A. PROGRAM

The MA program in economics provides students with advanced training in a core of applied microeconomics, macroeconomics, and econometrics. Students have a chance to apply analytic methods to business and economic policy issues, and to use advanced econometric techniques and computer software packages. In addition, the program provides advanced training in economics for students planning to enter a Ph.D. program domestically or abroad.

PROGRAM OF STUDY

A variety of lectures and seminars will be provided to students. Assessment is made by written examination, assessed coursework, presentation, and a dissertation.

Department of International Trade

The Department of International Trade offers highly ranked postgraduate programmes in International Management, Economics & Commerce with the highest quality academic faculties, corporate networks, and state-of-the-art facilities. The programmes provide in-depth coverage of the globalization process, the international business environment and the operation of international commerce. They are designed to equip you with a mix of analytical and problem-solving commerce-related skills with a very strong emphasis on relevant international challenges and issues.

AREAS OF SPECIALIZATION

M.A. Program – Master of International Commerce

Ph.D. Program – Doctor of Philosophy in Business Administration

M.A. Program

The M.A. program in International Trade provides students with advanced training in a core of applied International Commerce, International Business, International Trade Theory and Balance of Payments Analysis. In addition, the program provides advanced training in International Trade for students planning to enter a Ph. D. program domestically or abroad. Every student enrolled in the Master's program has to complete eight subjects, six of which must be from the subjects offered by the Department of International Trade. The Master's student must take both the language test and the general examinations.

Ph.D. Program

The Ph.D. program in International Trade focuses on a core curriculum in International Commerce, International Business, International Trade Theory and Balance of Payments Analysis. Beyond this, we offer a number of specialized fields of study. The Ph.D. student must take twelve subjects, nine of which must be from the subjects offered by the Department of International Trade. The doctoral student must complete the course work and pass both the general examinations and the language test. The program is designed to prepare students for careers in consulting, domestic and multinational firms, and research institutes and provide students with university-level teaching experience.

PROGRAM OF STUDY

Teaching

Teaching is composed by a variety of lectures and seminars, which incorporates knowledge and learning, discourse and dialogue, and self-development.

Assessments

Written assignments are designed to allow students to demonstrate an in-depth understanding of the module, which students must apply to an issue concerned with a particular subject area. Examinations are included in some of the modules to determine students' individual effectiveness in responding to specific questions under time. Case study may be incorporated into the assessment of modules. Dissertation requires students to select an appropriate topic which provides sufficient scope to reflect theories and methods drawn from the programme.

COURSES

Common Courses

21601930	International Commerce
21601931	International Business
21601932	International Trade Theory
21601933	Balance of Payments Analysis

International Economics Major

21601934	Statistics and Mathematics for Economics & Business
21601935	Econometrics
21601936	Advanced Price theory
21601937	Advanced National Income theory
21601938	International Trade Policy
21601939	Industrial Policy
21601940	Seminar on International Trade Theory
21601941	Seminar on Balance of Payments Analysis
21601942	International Finance
21601943	Seminar on International Finance
21601944	Theory of Foreign Exchange
21601945	Seminar on Multinational Corporation
21601946	International Capital Movement
21601947	Seminar on Korea's Foreign Trade
21601948	Seminar on International Trade and Development
21601949	Seminar on International Economics I
21601950	Seminar on International Economics II
21601951	Seminar on Foreign Exchange Theory and Practices
21601952	International Trade Environment
21601953	Seminar on International Trade Environment
21601954	International Financial Market
21601955	Seminar on International Financial Market
21601956	International Economics Organizations
21601958	Studies on Theory of International Trade
21601959	Studies on Price Theory
21601960	Studies on Theory of National Income
21601961	Studies on Korea's Trade and Growth
21601962	Studies on International Trade Policy
21601963	Studies on Theory of Foreign Exchange
21601964	Theory of International Trade
21601969	Economics of Korean Market Institution
21602018	Institution Economics

International Business & International Commerce Major

21601970	Advanced International Contracts
21601971	Commercial Letter of Credit
21601972	International Business Transaction Law
21601973	Advanced International Transportation
21601974	International Commercial Arbitration
21601975	Advanced Marine Insurance
21601976	International Commercial Practice
21601977	Case Studies on International Business Transaction
21601978	Seminar on Marine Insurance
21601979	Seminar on Marine Transaction
21601980	Seminar on International Contracts
21601981	Seminar on Commercial Letter of Credit
21601982	Seminar on General Average
21601983	Seminar on International Commercial Arbitration
21601984	Seminar on International Business Transaction Law
21601985	Seminar on International Commercial Practices
21601986	Seminar on International Sale of Good Acts
21601987	Seminar on Bill of Lading and Charter Party
21601988	Seminar on Combined Transportation
21601989	Seminar on U.S Trade Acts
21601990	Seminar on Intellectual Property Right
21601991	International Economics Law
21601992	Research Methodology
21601993	Global Risk and Insurance
21601994	International Business Policy
21601995	International Comparative Management
21601996	International Corporations
21601997	International Technology Transfer
21601998	International Marketing
21601999	International Investment
21602000	International Financial Management
21602001	International Personnel Management
21602002	International Accounting
21602003	International Business Environment
21602004	International Trade Negotiation
21602005	Seminar on International Business Policy
21602006	Seminar on International Corporation

Department of International Trade

21602007	Seminar on International Marketing
21602008	Seminar on International Investment
21602009	Seminar on International Technology Transfer
21602010	Seminar on International Marketing Research
21602011	Seminar on International Comparative Management
21602012	Seminar on International Business Environment
21602013	Seminar on International Trade Negotiation
21602014	Seminar on International Business I
21602015	Seminar on International Business II
21602016	Studies on International Business Transaction Law
21602017	Studies on International Commercial Arbitration System
21601957	Foreign Direct Investment
21601966	Chinese Trade
21601967	Direct Investment in China
21601968	Chinese Financial Market

Department of Accounting

01

Humanities & Science

The Department of Accounting offers an educational foundation that will prepare students for professional careers in business and accounting and enable them to pursue academic careers in accounting by providing in-depth study of advanced accounting topics and techniques as well as expansion of their critical thinking and research skills.

AREAS OF SPECIALIZATION

The Master's degree program in accounting aims to provide graduate education that prepares students to meet professional practical challenges in public, private, and not-for-profit accounting in order to further develop the skills required for success in the accounting profession. The Ph.D program in accounting is offered for accounting practitioners and future researchers to develop and be equipped with the capability to review and analyze various practical and theoretical accounting issues, to conduct researches and publish papers, and to teach accounting disciplines in the colleges or universities.

Financial Accounting

The Financial Accounting specialization is intended for students who want to expand or begin their careers in industry, government, or nonprofit accounting. The curriculum includes financial reporting and analysis, with concentrations on international financial reporting standards and practices. Emphasis is placed on acquiring relevant knowledge and on research and analytical skills.

Management Accounting

The management accounting specialization is intended for students who want to expand or begin their careers in industry, government, or nonprofit accounting. The curriculum includes budgeting, cost management, internal control system, and information economics. Emphasis is placed on acquiring relevant knowledge and on research and analytical skills.

Tax Accounting

The tax specialization is intended for students who want to begin or expand their careers as tax consultants in public or private accounting. The curriculum allows foundational and in-depth analyses of Korean income tax issue and transactions affecting corporations, partnerships, and individuals. Emphasis is placed on acquiring relevant knowledge and on research and analytical skills.

Department of Accounting

Auditing

The auditing specialization is intended for students who want to begin or expand their careers as auditor in industry, government, or nonprofit accounting. The curriculum allows foundational and in-depth analyses of Korean Standards on Auditing with Application Guidance for the Standards. Emphasis is placed on acquiring relevant knowledge and on research and analytical skills .

Accounting Information System

The accounting Information System specialization is intended for students who want to begin or expand their careers as accounting and IT consultants in public or private accounting. Emphasis is placed on acquiring business-process management and security. The strategies for integrating government and compliance, and the IT organization's financial and business intelligence services.

PROGRAM OF STUDY

Each class consists mainly of a variety of lectures and seminars. Students are usually assessed by written examination, class participation, presentation and homework, each of whose importance or proportion determining final grade varies across classes.

COURSES

Common Courses

21602271	Financial Accounting
21602272	Management Accounting
21602273	Tax Accounting
21602274	Auditing
21602275	Financial Statements Analysis
21602276	Research Methodology
21602277	Study on Financial Accounting
21602299	Case Study on Management Accounting
21602279	Study on Tax Accounting
21602284	Research Methodology in Accounting I
21602285	Research Methodology in Accounting II
21602324	Accounting Information System

Financial Accounting

21602286	Advanced Accounting
21602287	International Accounting
21602288	Nonprofit Organization Accounting
21602289	Study of Accounting History
21602290	Seminar on Consolidations
21602291	Seminar on International Accounting
21602292	Seminar on Nonprofit Organization Accounting
21602293	Seminar on Social Accounting
21602294	Study on Accounting Policy
21902295	Special Topic of Financial Accounting
21602296	Study of Market Based Accounting Research
21602297	Seminar on Financial Accounting
21602298	Seminar on Environmental Accounting

Department of Accounting

Management Accounting

21602300	Cost Accounting
21602302	Budgeting
21602303	Advanced Management Accounting
21602304	Seminar on Cost Accounting
21602305	Special Topic of Management Accounting
21602306	Study of Behavioral Accounting
21602307	Seminar on Budgeting
21602308	Study of Internal Control System
21602311	Decision Making in Management Accounting
21602309	Seminar on Management Accounting
21602310	Study on Management Accounting Systems
21602312	Information Economics

Tax Accounting

21602313	Tax Law
21602314	Taxation Theory
21602315	Seminar on Tax Accounting
21602317	Theory and Practice in International Taxation
21602318	Corporate Tax Accounting
21602319	Income Tax Accounting
21602320	Value Added Tax Accounting
21602323	Seminar on Corporate Tax Strategy
21602322	Local Tax Theory

Auditing

21602280	Study on Auditing
50235453	Auditing Theory
50235467	Seminar on Auditing
50235468	Special Topic of Auditing

Accounting Information System

21602325	Processing Accounting Data
21602326	Auditing Information Systems
21602329	Studies on Database Application

21602331	Accounting System Analysis and Design
21602332	Seminar on Accounting Information Systems
21602333	Applications of Computers and Communications
21602334	Applications of Expert Systems
21602336	Decision Support Systems with Accounting Information

DEPARTMENTAL REQUIREMENTS

Every student should take the common course during 1st and 2nd semester, which includes Research Methodology and major four subjects of accounting disciplines. In 3rd and 4th semester, students will focus their efforts on main research interest and issues which will be also their major.

Common Course

- 1st Semester :** 21602271 Financial Accounting
 21602272 Management Accounting,
 21602276 Research Methodology
- 2nd Semester :** 21602274 Auditing
 21602273 Tax Accounting
 21602284 Research Methodology in Accounting I

Financial Accounting

- 3rd Semester :** 21602286 Advanced Accounting
 21602287 International Accounting
 21602288 Nonprofit Organization Accounting
- 4th Semester :** 21602294 Study on Accounting Policy
 21902295 Special Topic of Financial Accounting
 21602296 Study of Market Based Accounting Research

Management Accounting

- 3rd Semester :** 21602300 Cost Accounting
 21602302 Budgeting
 21602311 Decision Making in Management Accounting

Department of Accounting

- 4th Semester** : 21602304 Seminar on Cost Accounting
21602305 Special Topic of Management Accounting
21602308 Study of Internal Control System

Tax Accounting

- 3rd Semester** : 21602313 Tax Law
21602314 Taxation Theory
21602318 Corporate Tax Accounting
- 4th Semester** : 21602315 Seminar on Tax Accounting
21602319 Income Tax Accounting
21602323 Seminar on Corporate Tax Strategy

Auditing

- 3rd Semester** : 21602286 Advanced Accounting
21602280 Study on Auditing
50235453 Auditing Theory
- 4th Semester** : 21602294 Study on Accounting Policy
50235467 Seminar on Auditing
50235468 Special Topic of Auditing

Accounting Information System

- 3rd Semester** : 21602325 Processing Accounting Data
21602326 Auditing Information Systems
21602331 Accounting System Analysis and Design
- 4th Semester** : 21602332 Seminar on Accounting Information Systems
21602333 Applications of Computers and Communications
21602336 Decision Support Systems with Accounting Information

Qualifying Examination

Tests in five areas will be made. That of Research Methodology is a must for every student and two of four optional areas should be chosen and answered.

- 1) core area : Research Methodology
- 2) optional areas : Financial Accounting, Management Accounting, Tax Accounting, Auditing

MEMBERS OF FACULTY

Department of Entrepreneurship and Small Business

Entrepreneurship has become a worldwide phenomenon, with fast growing ventures and small business infusing and changing the scope of the business world. In recognition of its importance, the graduate program opened in September, 2003, Soongsil University became the first full-fledged institution in Korea to be specialized in small business and entrepreneurship studies. Despite its short history, the graduate program has been successful and has grown rapidly.

AREAS OF SPECIALIZATION

The program aims to teach students to have a wide perspective as one of boundless potential to be realized and to pursue this potential by developing entrepreneurship. The program stresses entrepreneurial management focusing on practice-based and real-world approaches to develop entrepreneurial thinking, which consists of opportunity recognition, innovation, creative problem solving, and knowledge-based management.

1. Entrepreneurship
2. Entrepreneurial Marketing
3. Entrepreneurial Finance and Venture Capital

PROGRAM OF STUDY

Through the program based on case & field study methods, students are able to learn innovative managerial skills that lead to technological change and productivity growth in small business and eventually to pursue the formation of their own businesses.

COURSES

Common Courses

21602487	Entrepreneurship
21602492	Small Business Strategic Planning
21602491	Small Business Human Resource Management
21602494	Small Business Marketing Strategies
21602495	Small Business Finance and Cash Flow Management
21602493	Small Business Marketing Research
21602518	Marketing Research & Planning

Entrepreneurship

21602505	The Value Chain of Entrepreneurship
21602506	Small and Medium sized Enterprises and New Venture Analysis
21602507	Corporate Vision and Leadership
21602508	Research on Success
21602509	Female and Family Businesses
21602510	Seminar in Strategic Management for SMEs
21602511	Seminar in Human Resource Management for Venture & SMEs
21602488	Consulting and Communication Management
21602489	Entrepreneur Assessment and Decision Making
21602501	Practice of Management Consulting
21602500	Case Studies on Management Consulting
21602490	Innovation and Restructuring
21602513	Entrepreneurship and Innovation
21602515	Analysis of Entrepreneurial Opportunity and Changes in Technology
21602516	Expansion of Global Market and International Start-Ups
21602517	Seminar in Promotional Policy for Venture & SMEs
21602503	Special Topics on Venture & SMEs

Entrepreneurial Marketing

21602519	Strategic Marketing Management
21602504	Special Topics in Venture Marketing
21602520	Studies in Consumer Behavior
21602521	Service Management
21602522	Supply Chain Management

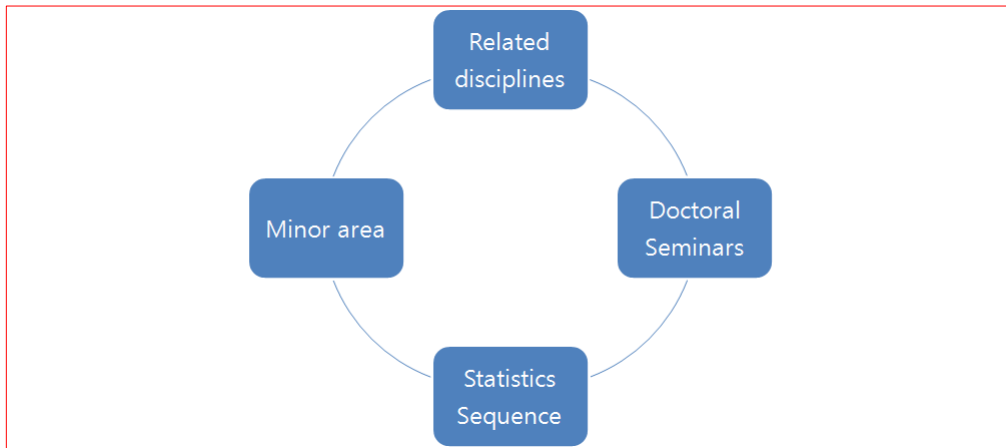

Department of Entrepreneurship and Small Business

21602523	Strategic Marketing Channel Management
21602524	Franchising Planning & Operating
21602525	Strategic Retailing Management
21602526	Personal Selling & Sales Management
21602527	Trend Analysis and Identification and Implementation of Business Opportunities
21602528	Promotion Management
21602529	Trade Area Analysis and Development
21602498	E-Commerce Market Planning
21602497	E-Commerce Business Model Development
50073064	Seminar in Strategic Brand Management
50084013	Multivariate Analysis
50084015	Seminar in Behavioral Marketing Research
50073060	Service Science in Retailing and Channels of Distribution
50084016	Design Marketing

Entrepreneurial Finance and venture

21602530	Financial Statement Analysis for Venture and SMEs
21602496	Small Business Financial Analysis
21602531	Theory of Entrepreneurial Finance
21602532	Valuation Models for Venture & SMEs
21602533	Money and Capital Market for Venture & SMEs
21602534	Research Methods in Finance
21602499	Feasibility Study and Business Planning
21602502	Performance Analysis and Growth Management for Venture & SMEs
21602536	Seminar in Investments for Venture & SMEs
21602537	Seminar in Corporate Finance for Venture & SMEs
21602538	Seminar in Financial Market and Venture Capital
21602539	Mergers and Acquisitions for Venture & SMEs
21602541	Seminar in Credit Analysis for Venture & SMEs
21602540	Risk Management Venture & SMEs
21602535	Special Topics in Entrepreneurial Finance

Natural Science

Natural Science

Department of Mathematics

The department of Mathematics offers programs for Ph. D. and M. S. degrees. Our faculty members are actively working in a variety of areas including algebra, analysis, topology, combinatorics, dynamical system and biomathematics.

After completing their graduate studies, students can move into post-doctoral programs, faculty positions and lecturers in universities, as well as various private sectors that require mathematical skills.

Currently most graduate students in the department receive financial supports through teaching assistantship. The department also provides Ph. D. students with the opportunity to teach calculus and other elementary mathematics courses.

AREAS OF SPECIALIZATION

The specialized research areas in the department include :

Analysis - Functional Analysis, Nonlinear Analysis, Complex Analysis

Algebra - Lie Group, Lattice Theory

Topology - General Topology

Applied Mathematics - Cryptography, Combinatorics, Dynamical system, Biomathematics

PROGRAM OF STUDY

The Mathematics department offers basic courses of master's level and advanced research topics courses. The department also offers customized courses depending on each student's ability.

The main goal of the graduate program in the Department of Physics is to provide professional education to potential physicists in theoretical and experimental physics. It also aims to train professional researchers in various fields of industry where background knowledge in physics is essential.

AREAS OF SPECIALIZATION

Condensed Matter Physics

- X-Ray Physics
- Nano Mesoscopic Physics
- Physics of Magnetism
- Statistical Physics
- Superconductivity
- Spectroscopy in Solids
- Surface/Interface/Thin Film Physics

Particle and Astroparticle Physics

- Elementary Particle Physics
- Astroparticle Physics

Plasma Physics

- Plasma Physics

PROGRAM OF STUDY

Graduate education in physics at Soongsil University offers students a variety of courses in both theory and experiments. In theory, training is focused on the enhancement of ability to simplify given physical phenomena, to build physical models, and to analyze them using mathematical and computational methods. In experiments, students may learn various methods of testing and verifying physical theories by executing experiments and analyzing their results.

COURSES

Common Courses

21602876	Classical Mechanics
21602877	Electricity and Magnetism
21602878	Electrodynamics
21602879	Quantum Mechanics
21602880	Advanced Quantum Mechanics
21602881	Mathematical Physics
21602883	Statistical Mechanics
50084150	Special Topics in Physics 1
50084151	Special Topics in Physics 2
21602891	Advanced Physics Laboratory
50084152	Physics Seminar 1
50084153	Physics Seminar 2
21602906	Physics Research 1
21602907	Physics Research 2

Condensed Matter Physics

21602882	Atomic and Molecular Physics
21602884	Advanced Statistical Mechanics
21602885	Physics of Magnetism
21602886	Seminar for Physics of Magnetism
21602888	Field Theory and Statistical Physics
21602896	Spectroscopy
21602897	Quantum Optics

21602898	Applied Optics
21602899	Nonequilibrium Statistical Mechanics
21602900	Phase Transitions and Critical Phenomena 1
21602901	Phase Transitions and Critical Phenomena 2
21602902	Mathematical Statistical Mechanics
21602903	Topics in Statistical Physics
21602904	Advanced Magnetic Physics
21602908	Solid State Physics 1
21602909	Solid State Physics 2
50084154	Optical Properties of Solids
21602912	Special Topics in Optical Properties of Solids
21602913	Magneto-optics Physics
50084155	Spectroscopy of Solids 1
50084156	Spectroscopy of Solids 2
21602915	Magnetic Recording Physics
21602916	Introduction to Superconductivity
21602917	Advanced Superconductivity 1
21602918	Advanced Superconductivity 2
21602919	Advanced Topics in Superconductivity
21602920	Topics in Magnetic Physics
21602921	Introduction to X-ray Diffraction and Applications
21602922	Advanced X-ray Diffraction Theory
21602923	Special Topics in X-ray Diffraction
21602924	Nano Physics
21602925	Molecular Electronics
21602926	Low-Dimensional Physics
21602927	Surface Physics
21602928	Synchrotron Radiation Physics
21602929	Structural Analysis of Thin Films
50086777	Organic Semiconductor Physics

Particle and Astroparticle Physics

21602887	Quantum Field Theory
21602932	Nuclear Physics
21602933	Advanced Nuclear Physics
21602934	Linear Accelerator Physics
21602935	Many-Body Problems
21602936	Elementary Particle Physics

Department of Physics

21602937	General Relativity
21602938	Advanced Quantum Mechanics 2
21602948	Gravitation and Cosmology
21602949	Astrophysics
21602950	Advanced Astrophysics
21602951	Cosmological Physics

Plasma Physics

21602939	Plasma Physics
21602940	Advanced Plasma Physics1
21602941	Advanced Plasma Physics2
21602942	Applied Plasma Physics
50084157	Space Plasma Physics
50084158	Tokamak Physics 1
50084159	Tokamak Physics 2
50084160	Numerical Simulations of Plasma
50084161	Plasma Diagnostics
21602946	Turbulence1
21602947	Turbulence2

DEPARTMENTAL REQUIREMENTS

Master course

A candidate must take three out of four option modules (Classical Mechanics, Electricity and Magnetism, Quantum Mechanics, and Statistical Mechanics) before applying for the qualifying exam.

PhD course

- 1) A candidate must publish at least one paper related to his/her dissertation in an SCI journal. A certificate of acceptance for publication is regarded as identical to actual publication.
- 2) After completion of course work, a candidate must give a presentation at least once a semester on the progress of dissertation in the presence of professors of the department of physics. A presentation in a physics conference may be accepted as a substitute upon approval.

MEMBERS OF FACULTY

Department of Chemistry

Chemistry treats the most central topics of all the sciences. Energy and materials around us are closely related to the areas of Chemistry which are our current research interests called Analytical, Inorganic, Organic, Physical and Biochemistry. Chemistry also contributes to other disciplines such as Bioscience, Materials Science, Medicine, Pharmacology and Physics. Our department is engaged in researches of structures, properties, and reactions of the various organic, inorganic, and biomolecules. These research activities focus on developing applicable molecules or materials which will benefit the health and happiness of mankind. Students are expected to have the abilities to carry out new research works through the educational programs provided by the department.

AREAS OF SPECIALIZATION

The aim of the graduate program in Chemistry is to provide an environment for students to develop the skills to become leaders in scientific research and education, capable of making original contributions to the advancement of Chemistry and related disciplines. Currently programs for the M.S. and Ph.D. degree are offered in Analytical, Bio, Inorganic, Organic, and Physical Chemistry.

PROGRAM OF STUDY

Our Graduate Program provides students with the opportunity to choose an appropriate curriculum for their specific interests and career plans. Research is the core of the graduate program, and the many research groups, each under the direction of a faculty member, are the basic educational and scholarly units of the department. Therefore, it is the most important to choose a research group appropriate to individual's talents and interests. We also maintain an extraordinarily active seminar program, featuring eminent speakers whose research is at the forefront of science. Inter- or intra-departmental collaborative researches in such interdisciplinary areas as bioanalytical, bioorganic, bioinorganic, chemical biology, materials chemistry, physical organic chemistry, organometallic chemistry, and biophysics are possible.

21603134	Protein Purification Theory
21603135	Cellular and Molecular Biology
21603136	Cell Signalling
21603137	Protein Structure Analysis
21603138	Structure of Biological Macromolecules

DEPARTMENTAL REQUIREMENTS

University regulations require to take more than 24 credits (for M.S degree) or 60 credits (for Ph.D degree), including at least one of common courses such as advanced analytical, advanced inorganic, advanced organic, or advanced physical chemistry. It is also required to pass foreign language examination and a seminar-like oral presentation followed by questions which test the candidate's preparation to do the thesis research. The general examination based on the general knowledge, and a public oral seminar based on their thesis research should be taken. Finally, the department faculty evaluate the thesis, and the student finishes the degree requirements by defending the thesis research in a final oral examination before the Generals Committee.

Department of Statistics and Actuarial Science

One of the educational missions of the department is to foster students who are capable of analyzing statistical information in various areas of application as well as pursuing excellence in the research of statistics. Actuarial science program of the department aims to prepare students for careers in the actuarial profession or related areas by emphasizing the theory that underlies risk processes and applications of this theory to problems of insurance and financial fields. To achieve these missions, the department provides solid degree programs and excellent instruction in statistics and actuarial science.

AREAS OF SPECIALIZATION

Statistics

Statistics is the scientific application of mathematical principles to real world problems of uncertainty. It is about the collection, analysis, presentation, and the interpretation of numerical data. Statisticians contribute to the process of rational decision making by applying their mathematical and statistical knowledge to the design of surveys and experiments.

Actuarial Science

Actuarial science is the application of mathematical and statistical methods to assess risk in insurance and finance industries. It covers various topics on risk associated with insurance operations such as pension mathematics, rate making, mortality study, risk management, and financial engineering. After completing required coursework, students may deepen their knowledge about specific areas under independent supervision and can prepare for professional actuarial exams offered in various countries. Also, students have opportunities to prepare for the core issues of the insurance industry by attending department colloquiums.

50235479	Actuarial Practice II
50235480	Principles of Social Insurance
50235481	Actuarial Management I
50235482	Actuarial Management II

DEPARTMENTAL REQUIREMENTS

Statistics

1st Semester : Mathematical Statistics I, Financial Mathematics I, Regression Analysis

2nd Semester : Linear Models 1, choices of two out of three; Multivariate Statistical Analysis I, Statistical Computing I and Stochastic Processes I.

3rd Semester : Data Mining, choice of one out of two; Time Series Analysis I and Bayesian Statistics.

Actuarial Science

1st Semester : Mathematical Statistics I, Financial Mathematics I, Non-Life Actuarial Mathematics I

2nd Semester : Financial Mathematics II, Life Actuarial Mathematics I, Non-Life Actuarial Mathematics II

3rd Semester : Life Actuarial Mathematics II, choices of two out of following courses; Principles of Insurance, Financial Econometrics, Seminar in Actuarial Statistics I & II, Life Insurance Product Development, Pension Mathematics, Actuarial Science for Health Insurance etc.

Department of Bioinformatics and Life Science

Bioinformatics is an integrative science which combines biotechnology and information science. The Department of Bioinformatics and Life Science at Soongsil University was founded in 2001 as the first bioinformatics department in Korea, and the graduate program was established in 2005. The educational goal of our department is to train students as interdisciplinary specialists who can utilize informatics tools to analyze vast amount of data in biology, thereby obtaining knowledge that contributes to human welfare.

AREAS OF SPECIALIZATION

The graduate program in the Department of Bioinformatics and Life Science provides both Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees. A student can major in either Bioinformatics or Life Science. Regardless of their majors, the students are expected to take multiple courses in biology and informatics to obtain knowledge necessary for becoming a successful interdisciplinary scientist. In particular, a student in the Ph.D. course is trained to be an independent researcher who can set the direction of their own research.

PROGRAM OF STUDY

Lectures mainly take place in class including the weekly seminars given by the invited speakers. Courses are evaluated by various methods such as written examinations, reports, presentations, and assessed coursework. Both M.S. and Ph.D. candidates are required to write a thesis for the fulfillment of their graduation. In addition, Ph.D. candidates are expected to publish their works in scientific journals.

50107147	Advanced Population Genetics

DEPARTMENTAL REQUIREMENTS

Courses should be taken from three major courses (common course, life science, and bioinformatics) opened each semester.

Candidates for M.S. should take 24 credits over 4 semesters.

Candidates for Ph.D. should take 36 credits over 4 semesters.

Students for the combined M.S. & Ph. D. program should take 60 credits over 8 semesters.

Park, SangYoun	Assistant Professor	Ph.D. (Cornell University)	Structural Biology, Biophysical Chemistry	psy@ssu.ac.kr

Engineering Engineering

Department of Chemical Engineering

Our department offers a broad range of educational and research activities that meet the important technological challenges of our society. Current challenges are emerging in the complex forms that demand intricate blending of traditional chemical engineering and materials science as well as careful consideration of the environmental and economical requirements. In this challenging era, our department is strategically positioned to create new knowledge and educate leaders for our society by investigating diverse research projects in polymer engineering, reaction engineering, emulsion materials, advanced process control, novel materials processing, biochemical engineering, water treatment, catalysis & air pollution control, next generation energy materials, and bioinspired & biomimetic materials.

AREAS OF SPECIALIZATION

- **MS in Chemical Engineering,**
Ph.D in Chemical Engineering.

The goal is to educate high-quality experts and mid-level managers with excellent capabilities in the area of Chemical and Environmental Engineering under the educational motto of Soongsil University, "Truth and Service".

- **MS in Beauty Science and Technology,**
Ph.D in Beauty Science and Technology.

The goal of the Department of Beauty Engineering is to educate high-quality experts and mid-level managers with excellent capabilities in the area of Beauty Engineering under the educational motto of Soongsil University, "Truth and Service".

PROGRAM OF STUDY

Teaching is accomplished by a variety of lectures, seminars, and term projects. Assessment is done by written examination, assessed coursework, presentation, term projects, and a dissertation. The final grade is awarded by evaluating various modules. To become Master candidates or Ph.D candidates, he/her should pass the Qualifying examination.

COURSES

Common Courses

21603495	Special Topics in Chemical Engineering
21603496	Advanced Reaction Engineering
21603497	Advanced Chemical Engineering Thermodynamics
21603498	Advanced Industrial Inorganic Chemistry
21603499	Advanced Industrial Organic Chemistry
21603500	Advanced Chemical Engineering Mathematics
21603501	Advanced Environmental Engineering
21603503	Advanced Instrumental Analysis
21603565	Advanced Fine Particle Technology
21603511	Advanced Heat Transfer
21603512	Mass Transfer
21603513	Advanced Plant Design
21603518	Advanced Process Control
21603530	Advanced Biochemical Engineering
21603505	Nano Engineering
21603506	Renewable Energy Conversion Engineering
21603507	Display Engineering

Chemical Engineering

21603504	Catalyst Engineering
21603508	Advanced Process Design
21603510	Powder Engineering
21603515	Rheology

Department of Chemical Engineering

21603524	Advanced Transport Phenomena
21603519	Fluifization Engineering
21603520	Advanced Equipment Design
21603521	Advanced Separation Process
21603522	Advanced Process System Engineering
21603523	Process Optimization
21603526	Advanced Petrochemical Engineering
21603528	Special Topics in Acid and Alkali Industries
21603525	Advanced Polymer Synthesis
21603531	Polymer Process Engineering
21603532	Advanced Engineering Inorganic Materials Engineering
21603534	Process Engineering
21603535	Engineering Organic Materials Engineering
21603536	Topics on Polymer Reaction
21603537	Structure and Properties of Polymer
21603539	Advanced Applied Interface Chemistry
21603540	Polymer Blend and Composite
21603541	Polymer Processing
21603542	Advanced Polymeric Engineering
21603543	Topics on Fine Chemicals
21603544	Waste Water Treatment Engineering
21603545	Water Control
21603547	Air Pollution Engineering
21603549	Environmental Sampling & Analysis
21603550	Law and Regulations on Environment
21603551	Environmental Impact Assessment Engineering
21603552	Water Chemistry
21603554	Pollution Abatement From Underground Water and Soil
21603555	Advanced Bioprocess Engineering
21603556	Microbiological Engineering
21603557	Enzymatic Engineering
21603558	Bioseparation Processes
21603560	Reactor Analysis and Design
21603561	Drinking water treatment
21603562	Functional Polymer
21603563	Electronic Polymer
21603564	Semiconductor Environmental Engineering
21603566	Energy Devices
50127681	Energy Engineering

50229147	Industry Seminar, Practical Training, and Internship I
50230989	Introduction to Greenhouse Gases and Climate Change

Beauty science and Technology

21603571	Special Course of Beauty Engineering
21603572	Advanced Cosmetology
21603573	Science of Novel Natural Materials
21603574	Advanced Functional Cosmetology
21603575	Advanced Color Cosmetology
21603576	Prevention of Aging and Natural Anti-oxidative Agents
21603577	Advanced Dermatology
21603578	Beauty Theraphy and Nutrition
21603579	Advanced Beauty Theraphy
21603580	Clinical Study
21603581	Alternative Medicine
21603567	Body Contour
21603568	Skin Aging
21603569	Human Anotomy
21603570	Immunology
21603582	Seminar

DEPARTMENTAL REQUIREMENTS

Master Course

1st Semester : 3 courses in a specialized field

2nd Semester : 3 courses in a specialized field

3rd Semester : 2 courses in a specialized filed, Qualifying Exam

4th Semester : Dissertation

Lim, Il-Woong	Emeritus Professor	Ph.D. (Myongji Univ.)	Mass Transfer	

Department of Organic Materials and Fiber Engineering

Organic Materials greatly enhance nation's industrial competitiveness and are a key point in achieving high value-added objective. This is because development of core materials for a next era could bring an innovative change in every aspects of industry. Therefore, the Department offers extensive programs including both fundamental theory and application technology required in industries of organic materials and textiles for Digital Era so that the students are able to graft the basic theory into practical application. We, the Department of Organic Materials and Fiber Engineering, produce qualified professionals, who are posed in the center of the nation's economy with creative intelligence and good-natured leadership.

AREAS OF SPECIALIZATION

The Department provides classes for fundamental theory and applied technology that are essential to the industries of organic materials and fiber engineering in a new era. It also offers various programs for fulfilling the mission of the University - truth and service spirit. Our primary goal is to prepare skillful scientists and engineers with creative knowledge and moral leadership to take a major role in developing the nation's industry.

PROGRAM OF STUDY

Program is available in a variety of lectures and seminars. Assessment is done by written examination, evaluated courseworks, presentation, and dissertation.

COURSES

21603613	Advanced Textile Physics
21603617	Physical Chemistry of Polymers
21603662	Advanced Mechanics of Materials
21603663	Applied Statistics for Textile
21603621	Transportation Phenomena
21603622	Fiber Formation
21603664	Process Control
21603624	Fashion Retailing Management
21603626	Fashion Marketing Channel
21603660	Natural Organic Materials
21603628	Advanced Instrumental Analysis I
21603629	Physical Properties of Polymers
21603665	Structure and Properties of Fibers
21603631	Polymer Physics
21603632	Carbon Nanocomposites
21603634	Atomic and Molecular Structure of Materials
21603666	Fibrous Assembly Engineering
21603667	Nonwoven Technology
21603668	Analysis of Variation
21603669	Polymer Composite
21603646	Yarn Structure Mechanics
21603648	Advanced Textile Measurement
21603698	Textile Engineering and Environment
21603661	Special Topics in Organic Materials
21603701	Recent Trends in Research and Development of Textiles
21603702	Advanced Organic Chemistry for Polymers
21603633	Organic Materials For Electronic Application
21603703	Surface Functionalization of Materials
21603704	Advanced Organic Chemistry
21603670	Special Topics in Fiber Engineering
21603650	Advanced Fashion Marketing
21603651	Research Methods in Textile Fashion
21603652	Special Topic of the Fashion industry
21603653	Supply Chain Management in Fashion Business
21603671	Apparel Management Planning
21603655	Visual Merchandising

21603656	Consumer Behavior of Fashion
21603657	Ergonomic Product Design
21603658	Reliability Engineering
21603681	Physical Chemistry of Dyeing Phenomena
21603683	Chemical Analysis of Organic Materials
21603672	Modification of Organic Materials
21603673	High Performance Organic Materials
21603674	Functional Organic Materials
21603675	Polymer Synthesis
21603692	Advanced Instrumental Analysis II
21603693	Theory of Dyeing
21603694	Chemistry of Organic Colorants
21603676	Color Science and Engineering
21603677	Functional Finishing of Textiles
21603697	Interfacial Phenomena of Textiles
21603705	Rheology of Polymeric Fluids
21603706	Advanced Polymers Processing
21603707	Crystallization of Polymers
21603708	Experimental Methods off Organic Materials
21603709	Conductive Polymers
50084103	Organic Semiconductor Properties and Devices I
50084104	Organic Semiconductor Properties and Devices II
50227970	Advances in Solar Cell
50236218	Industry Seminar, Practical Training, and Internship II

DEPARTMENTAL REQUIREMENTS

1st Semester : three courses

2nd Semester : three courses

3rd Semester : two courses and qualifying examination

4th Semester : M.S. Thesis or Ph.D. Dissertation

Department of Organic Materials and Fiber Engineering

MEMBERS OF FACULTY

Name	Position	Degree	Major	E-mail
Hyeon-Tae Cho	Professor	Ph.D. (Seoul National University)	Synthetic Fibrous Materials, Color Science & Engineering, Dyeing Chemistry	choht@ssu.ac.kr
Young Ho Kim	Professor	Ph.D. (Seoul National University)	Functional Organic Materials, Textile Finishing	ssyhkim@ssu.ac.kr
Hyun-Joo Shim	Professor	Ph.D. (North Carolina State University)	Nonwoven Processing, High Performance Nonwoven Filter	hjshim@ssu.ac.kr
Cheol-Jae Hong	Professor	Ph.D. (North Carolina State University)	Health and Safety, Fabric Design	cjhong@ssu.ac.kr
Hyung-Min Choi	Professor	Ph.D. (University of Maryland at College Park.)	Modification and Analyses of Organic Materials, Natural Fibrous Materials,	hchoi@ssu.ac.kr
Sang-Moo Shin	Professor	Ph.D. (University of Texas at Austin)	Fashion Marketing, Apparel Production Management	smshin@ssu.ac.kr
Youngjin Jeong	Professor	Ph.D. (Seoul National University)	Polymer Nano Composites	yjeong@ssu.ac.kr
Joo-Yong Kim	Associate Professor	Ph.D. (North Carolina State University)	Nanoelectronics materials	jykim@ssu.ac.kr
Young-Je Kwark	Associate Professor	Ph.D. (University of Massachusetts Amherst)	Polymer Synthesis, Nanohybrid Materials	ykwark@ssu.ac.kr
Jeong Ho Cho	Assistant professor	Ph.D. (Pohang Polytech University)	Organic Electronic devices (OTFTs, OLEDs, OSCs), Multifunctional nanofiber	jhcho94@ssu.ac.kr
Seung Hyun Cho	Assistant Professor	Ph.D. (University of Florida)	Polymeric Materials, Polymer Synthesis, Liquid Crystalline Thermoset	scho@ssu.ac.kr
Kwang Bae Lee	Emeritus Professor	Ph.D. (Kyung Hee University)	Textile Physics, Textile Materials	--

Department of Electronic Engineering

- The competitive national reputation;
- Extensive research programs from which most students are financially supported.
- Excellent and various academic fields.
- MS and Ph.D courses which are exciting and academically challenging.

AREAS OF SPECIALIZATION

- **MS in Electronic Engineering**
- **Ph.D in Electronic Engineering**

In the Department of Electronic Engineering, we focus on training graduate students to become competent in their future workplace. Master candidates will learn up-to-date knowledge in their major fields. Ph.D candidates will perform leading researches which have an influence on modern information technology.

PROGRAM OF STUDY

Teaching is by a variety of lectures, seminars, and term projects. Assessment is by written examination, assessed coursework, presentation, term projects, and a dissertation. The final grade is awarded by evaluating various modules. To become Master candidates or Ph.D candidates, He/her should pass the Qualifying examination.

COURSES

Communications and Signal Processing

21603755	Signal and Systems
21603757	Probability and Statistics
21603768	Linear System Theory
21603771	Information Theory
21603772	Communication System
21603774	Signal Exchange Systems
21603775	Special Topics in Communication Circuit Analysis
21603779	Source Coding and Decoding
21603780	Digital Signal Processing
21603781	Knowledge Information Processing Systems
21603782	System Modeling and Simulation
21603832	Analysis of Digital Systems
21603784	Speech Information Processing
21603785	Special Topics in Digital Signal Processing
21603786	Biomedical Electronics
21603788	Image Information Comprehension
21603789	Design and Application of Fuzzy and Neural Computer
21603794	Analog Communications
21603795	Digital Communications
21603796	Channel Coding Theory
21603797	Spread Spectrum Communication System
21603798	Audio Coding
21603801	Image Coding
21603803	Code Division Multiple Access Systems
21603804	Multimedia Communications
21603805	Speech Communications
21603806	Exchange Systems
21603807	Speech Synthesis Techniques
21603808	Electronic Exchange Systems
21603809	Realistic Telecommunications
21603810	Speech Compress Coding
21603811	Multimodal Communications
21603812	Sound Effect Systems
21603813	Automatic Translation Systems
21603814	Ultrasonic Communication Systems

21603815	Underwater Acoustic Signal Processing
21603816	Navigating Communications
21603817	Satellite Communication Theory
21603818	Probability, Statistics and Random Signal Analysis
21603819	Communication Theory
21603820	Signal Transmission Techniques in Mobile Communications
21603821	Mobile Communication System
21603822	Satellite Transponder
21603823	Estimation and Detection Theory
21603824	Time Series Analysis
21603825	Communication Signal Processing
21603826	Nonlinear Signal Processing
21603827	Stochastic Signal Processing
21603828	Array Signal Processing
21603829	Sub-band Coding & Signal Processing
21603830	New-Media Communications
21603834	Special Topics in Mobile Communication Systems
21603835	Special Topics in Underwater Acoustic Communication
21603836	Underwater Acoustic Communication and Signal Processing
21603837	Orthogonal Frequency Division Multiplexing Systems
21603838	Advanced Modulation and Demodulation Technology
21603939	Detection Estimation and Filtering
21603940	Adaptive Filter Theory
21603941	Optimization Theory
50235693	Radar Signal Processing

Devices and Integrated Circuits

21603841	Analog Integrated Circuit Design
21603842	Digital Integrated Circuit Design
21603843	Advanced Integrated Circuit Design
21603844	VLSI Design
21603845	Special Topics in Physical Electronics
21603846	Integrated Circuit Fabrication Process
21603847	Special Topics in Semiconductor Devices
21603848	Special Topics in Integrated Circuits
21603850	Microwave Semiconductor Devices
21603851	Semiconductor Device Modeling
21603855	Special Topics in Magnetic Materials

Department of Electronic Engineering

21603858	Solid State Electronics
21603859	Device Electronics for Integrated Circuits
21603860	ASIC Design
21603861	Digital System Design
21603862	Semiconductor Devices 1
21603863	Semiconductor Devices 2
21603864	Optical Data Storage Engineering
21603865	Magnetic Materials
21603866	Magnetic Computer and Communication Devices
21603867	Magnetic Information Storage Engineering
21603868	Computer Data Storage Engineering
21603869	SoC Architecture
21603870	SoC Design Methodology
21603871	Design of Radio-Frequency Integrated Circuits
21603872	Design of Analog/Mixed Signal
21603873	Embedded System Design
21603874	IP Design and System Integration
21603875	Multimedia System Design
21603876	Full Custom Design
21603877	High Performance Memory Architecture Design
21603878	Communication System Design
21603879	Low Power System Design
21603833	Special Topics in Digital System Design
50235695	Flat Pannel Display Device and Technologies

Microwave and Lightwave

21503759	Electromagnetic Fields
21603880	Microwave Circuits
21603881	Radiation, Propagation and Scattering of Electromagnetic Waves
21603882	Analysis and Design of Antennas
21603883	Numerical Methods In Electromagnetics
21603884	Radar Systems
21603885	Computer Aided Design For Microwave Components
21603886	Special Topics in Microwave Technology
21603887	Special Topics in Antennas
21603888	Special Topics in CAD for Microwave and Millimeter-Wave Circuits
21603889	Special Topics in Electromagnetic Compatibility
21603890	Special Topics in Microwave Systems

21603891	Numerical Techniques for Microwave and Millimeter-Wave Passive Structures
21603892	Nonlinear Microwave circuits
21603893	Optical Electronics
21603895	Nonlinear Optics
21603896	Quantum Electronics
21603897	Optical Communication Systems
21603898	Fiber-Optic Networks
21603767	Techniques Against Electromagnetic Interference
21603899	Optics
21603900	Special Topics in Electromagnetic Waves
21603901	Propagation Theory
21603902	Special Topics in Wireless Communications
21603903	Satellite Communication Systems
21603904	Numerical Techniques for Microwave
21603905	Semiconductor Laser Diodes
21603906	Nonlinear Fiber Optics
21603907	Fiber-Optic Sensors
21603908	Integrated Optics
21603909	Photonic Switching
21603910	Photonics
21603911	Special Topics in Optical Electronics
21603912	Special Topics in Optical Communication Systems

Computer, Automation and Networks

21603787	Pattern Recognition
21603790	Data Communications
21603831	Queuing Theory and Application
21603793	Traffic Structures
21603799	Special Topics in Multimedia Technology
21603800	Multimedia System Design
21603840	Distributed Computing Systems
21603913	Introduction to Software
21603914	Operating Systems
21603916	Parallel Processing
21603917	Advanced Computer Architecture
21603918	Artificial Intelligence
21603919	Artificial Intelligence System Design
21603920	Expert Systems

Department of Electronic Engineering

21603921	Computer Networks
21603981	CAD/CAM
21603922	Robotics and Automatic Systems
21603923	Adaptive Control
21603924	Modern Control System Design and Application
21603925	Nonlinear Control Systems

21603946	Distributed Control Systems
21603769	Computer Architecture
21603947	Multimedia Information Retrieval
21603948	Special Topics in Multimedia Information Retrieval
21603949	Teleconferencing Systems
21603950	Special Topics In Information Communications
21603951	High Speed Communication Networks
21603952	Computer Network Design and Analysis
21603953	Network Programming
21603954	System Software Programming
21603955	Introduction to Compilers
21603956	Introduction to Database Systems
21603957	Information Retrieval
21603958	Multimedia User Interface
21603959	Medical Image Processing
21603960	Special Topics in Medical Image Processing

21603961	Protocol Engineering
21603962	Internetworking
21603963	Wireless Data Communications
21603964	Wireless Networks
21603965	Network Application Techniques
21603966	Network Security
21603967	Special Topics in Networks
21603968	Special Topics in Networks Analysis
21603969	Internet Networking Technology
21603970	Special Topics in Internet
21603971	Internet Computing Systems
21603972	Special Topics on Optical Network
21603973	Introduction to Information Security
21603974	Cryptography
21603975	Special Internet Security Technologies
21603976	Security for Wired and Wireless Internet
21603977	Mobile Computing System
21603978	Design and Implementation of Embedded Systems
21603979	Mobile Robot
21603980	Special Topics on Mobile Robot
21603839	Special Issues on Information Security
21603982	Standards on Information Security
21603983	Service and Policy on Information Security
21603984	Next Generation Mobile Communication Networks
21603985	Ubiquitous Networks
21603986	Next Generation Network Technology
21603987	Special Topics in Mobile/Wireless Networks
21603988	Special Topics in Multimodal Information Transformation Technology I
21603989	Special Topics in Multimodal Information Transformation Technology II
21603990	Special Topics in Multimodal Information Transformation Technology III
21603991	Internship
21603992	Life and Leisure Robot
50235697	IT Convergence Applications
50235698	IT Convergence Systems

DEPARTMENTAL REQUIREMENTS

Specialized Fields

- Communications and Signal Processing
- Devices and Integrated Circuits
- Microwaves and Lightwave
- Computer, Automation, and Networks

Master Course

1st Semester : 3 courses in a specialized field

2st Semester : 3 courses in a specialized field

3rd Semester : 2 courses in a specialized field, Qualifying Exam

4th Semester : At least 1 presentation in domestic or international conference, Dissertation

MEMBERS OF FACULTY

Name	Position	Degree	Major	E-mail
Yang, Seung-In	Professor	Ph.D. (KAIST)	Microwaves and Antennas	
Bae, Myung-Jin	Professor	Ph.D. (Seoul National University)	Speech Communication Engineering; Mobile and Handheld Communication; Sound Engineering	
Kim, Boo-Gyoun	Professor	Ph.D. (Univ. of Southern California)	Electromagnetic Wave Application ;Optical Devices and Sensors

Department of Electrical Engineering

The Department of Electrical Engineering's academic curriculum maintains a pure electrical engineering department which is core to electrical engineering industries. The education of excellent engineering researchers in a wide variety of electrical engineering fields and of excellent human resources leads the rapidly changing domestic and international industries. The department has produced over 300 graduates since 1977, and there are currently 12 operational labs in the school. The department was selected as the best graduate school of academic disciplines in 2000 by the Korea Council for University Education. The 'Song-Il-Geun Award' was established by the ABI in the United States to honor Dr. Song Il-Geun, one of our prominent graduates, for his work in the field of electrical engineering.

AREAS OF SPECIALIZATION

- **Energy and Industrial Electronics**

This major consists of energy conversion and power condition related to electrical engineering.

- **Electrical Materials and High Power**

This major consists of materials engineering, display engineering and high voltage engineering.

- **Measurement Control and System**

This major consists of control power systems engineering and power system engineering.

PROGRAM OF STUDY

Our education takes progress by various ways such as lectures and seminars. Based on basic knowledge of undergraduate courses, teaching progresses by choosing textbooks about updated electrical engineering fields, searching dissertations, the newest lab research trends, and professional guest lecturers from industrial fields.

COURSES

Common Courses

21604110	Numerical Analysis of Electromagnetic Field
21604116	Power Electronics
21604144	Theory of Material Properties
21604148	Topics in High Voltage Insulation
21604182	Linear Systems
21604187	Digital Signal Processing
21604201	Information Display Device Engineering
21604209	Power System Engineering
21604221	Advanced Engineering Mathematics
21604222	Engineering Management
50237704	Energy Storage System

Energy and Industrial Electronics

21604111	Electromagnetic Energy Conversion
21604112	Electric Machine Design I
21604113	Electric Machine Design II
21604114	Electric Machine for Special Purpose
21604117	Topics in Direct Energy Conversion
21604118	Microprocessor Applications
21604119	Computer Processor Control
21604120	Advanced Digital Electronic Circuits
21604121	Switch Automata Theory
21604122	Topics in Measurement Instruments

21604123	Sequential Machines
21604124	Instrumentation Control System
21604125	Robot Control
21604126	Intelligent Robot
21604128	Electromagnetic Nondestructive Testing
21604129	Finite Element Method for Electric Machine
21604130	Boundary Integral Equation Method for Electric Machine
21604131	Topics on Digital Automation System
21604132	Application of Microcontroller
21604133	Application of Mechatronics
21604134	Topics on Measurement & Signal Processing
21604135	Topics in Electromagnetic Sensor
21604136	Renewable Energy Conversion
21604137	Fuel Cell System Engineering
21604138	Electric Hybrid Vehicle Design
21604139	Advanced Power Electronic Systems
21604140	Design of the Motor Drive Systems
21604218	Switching Mode Power Supply Design
21604141	Superconducting engineering
21604142	Superconducting power application engineering
50074850	Introduction to Fuel Cells
50084021	Introduction to Fuel Cell Vehicle
50084022	Advanced Electric Machinery
50107160	Electric Energy Audit Engineering For GHG Mitigation
50125383	Superconducting fault current limiter
50231265	Industry-academy cooperation Seminar I
50237706	Special Topics in the Fuel Cells
50240908	Energy Engineering

Electrical Materials and High Power

21604143	Electromagnetic Field Theory
21604145	Topics in Dielectrics
21604146	Topics in Electric Conductivity
21604147	Topics in Superconductivity
21604149	Insulation Coordination in High Voltage Power System
21604150	Application of High Voltage Engineering
21604151	Theory and Application of Electric Discharge
21604152	Topics in Propagation Wave

Department of Electrical Engineering

21604153	High Current Engineering
21604154	Diagnosis of Electrical Equipments
21604155	High Voltage Direct-Current Transmission
21604156	Laser Engineering
21604157	Laser Application
21604158	Liquid Crystal Display Device Engineering
21604159	Electrical and Electronic Materials Engineering
21604160	Molecular Electronic Device Engineering
21604161	Flat Panel Display Device Materials
21604162	Opto-electronic Materials and Devices
21604163	Physics of Liquid Crystals
21604164	Thin-Film-Transistor Liquid Crystal Device
21604165	Ferroelectric Liquid Crystal
21604166	Advanced Lighting Engineering
21604167	Electrostatic Engineering
21604168	Advanced Theory of High Voltage Engineering
21604169	Lightning Discharge Theory
21604170	High Voltage Pulsed Power Engineering
21604171	Plasma Engineering
21604172	Microwave Engineering
21604173	Special Topics in Solid Physics
50125383	Solid-state lighting
50229181	Lighting System
50237703	Special Topics on the LED Lighting

Control and System

21604175	Power System Analysis
21604176	Operation and Control of Systems
21604177	Power Systems Planning
21604178	Power Protection Systems
21604179	Hierarchical Control of Power Systems
21604180	Design and Operation of Power Systems Apparatus
21604181	Network Analysis and Synthesis
21604183	Adaptive Control
21604184	Optimal Control Theory
21604185	Digital Control Theory
21604186	Topics in Stochastic Control
21604187	Digital Signal Processing

21604189	Design and Application of Adaptive Filters
21604190	Intelligent Control and its Application
21604191	Design of Control Systems
21604192	Numerical Analysis
21604193	Application of Artificial Intelligent to Power Systems
21604195	Simulation Engineering of Power Systems
21604196	Neural Network Theory
21604197	Topics in Digital Signal Processing
21604198	Pattern Recognition
21604200	Random Processes
21604206	Topics in Intelligent Systems
21604207	Reliability Analysis to Power Systems
21604208	Power Conversion and Energy Engineering
21604210	Distribution System Analysis and Control
21604211	Design and Application of Protection and Control System
21604212	Analysis and Estimation of Power Quality
21604213	Power System Economics
21604214	Transmission Price
21604215	Optimal Power Flow
21604216	Advanced Control Engineering
21604217	Electricity Trading
21604219	Nonlinear Systems
21604174	Display System Engineering
50086782	Special Topics in Information Technology for Power System
50086781	Applied Bioelectricity
50086783	Smart Grid
50125385	Electrical Plant Engineering & Design
50229179	Wind Power System
50237705	Control of Electric Machinery

Department of Mechanical Engineering

03

Engineering

Since 1969, with Soongsil university's founding idea and spirit of 'Truth and Service', the department of mechanical engineering has educated and nurtured students to make them creative in advancing the cause of the mechanical engineering and contributing to improvement of social and industrial welfare. So far, about 4,000 alumna with bachelor, master and doctoral degrees were graduated and are working actively in research, industry, education and governments. Currently the department is equipped with the latest research facilities and educational tools to train undergraduate students, who will become capable and professional mechanical engineers in the future. And the department also offers to the students an excellent and in-depth education in order for them to apply their knowledge and techniques learned during their education to not only industrial fields such as plants, electronics, semiconductors, automotive, electrical power, heavy industrial equipment, shipbuilding industries, etc. but also academic and research fields such as universities, research institutes, etc.

GRADUATE STUDY

Graduate School in the Department of Mechanical Engineering has a fine reputation for quality teaching and outstanding research since 1976. It is equipped with recently refurbished laboratories and specialized facilities for training graduate students to become competent and professional engineers and to lead in the development of advanced engineering technologies. The graduate students are taught by 12 professors who conduct in-depth research as well as teach practical mechanical engineering skills through various experiments and practice. There are funding opportunities for graduate students as general scholarships, TA's, and RA's, that benefit from research grants by industry and government as they work with their supervisor in the mechanical research field. Also, a newly wide range university-managed accommodation options are offered under related regulations. Graduates from the department of mechanical engineering, like our over 350 previous graduates, will find employment opportunities covering a wide range of industrial fields, including plants, electronics, semiconductors, automotive, electrical power, heavy equipment, etc., as well as university faculty, research positions in government laboratories, and independent businesses.

EDUCATIONAL GOALS

Based on the university's founding ideal of 「Truth and Service」 the Department of Mechanical Engineering primarily aims to play a leading role in the advancement of mechanical engineering and ultimately to contribute to the promotion of social welfare. To this end, the graduate program provides both a Master's program and a Doctoral program. Both degree programs educate field engineers who are capable of handling practical problems by applying fundamental theories and state-of-the-art technologies in mechanical engineering, and train high-quality human resources who are ready to participate in teaching, research, and management in multidisciplinary areas.

AREAS OF SPECIALIZATION

- **Thermofluids and Energy** : Air-conditioning and acoustics, Energy systems, Fluid flow, Automotive environment
- **Materials, Design and Production** : Solid mechanics, CAD/CAM, Advanced materials, Mechanical engineering design, Precision engineering
- **Dynamics and Control** : Automatic control, Vibration, Mechatronics

PROGRAM OF STUDY

The department offers graduate programs leading to the degree of Master of Science (MS) and Doctor of Philosophy (Ph.D), with speciality in mechanical engineering. A variety of lectures and seminars are currently offered by the department for both MS and Ph.D programs. Graduate programs offer preparation for a professional career, with possibilities in teaching and research, development, and management. The MS program is typically 2 years in duration, and involves both coursework and completion of a dissertation based on original research. Master's students must pass a competency exam to enter the research stage. During the first year, students should choose an advisor for research upon entering the program. The Ph.D. program has another admission process. Successful completion of the Ph.D requires coursework substantially beyond that taken at the master's level, passing of a qualifying exam typically taken after 2-3 years of study, and the completion and successful defense of a thesis based on high-quality and original research.

COURSES

Common Courses

21604472	Numerical Analysis
21604476	Acoustics
21604479	Signal Processing
21604480	Special Project in Mechanical Engineering
21604481	Advanced Engineering Mathematics
21604482	Mechanical Engineering Analysis
21604483	Experiment Design
21604484	Continuum Mechanics

Thermofluids and Energy

21604488	Advanced Fluid Machinery
21604492	Computational Fluid Dynamics
21604493	Biofluid Mechanics
21604499	Combustion Engineering
21604500	Advanced Internal Combustion Engines
21604501	Advanced Heat Transfer
21604502	Convection Heat Transfer
21604505	Statistical Thermodynamics
21604506	Aeroacoustics
21604511	Advanced Fluid Mechanics
21604512	Gas Dynamics
21604513	Energy Conversion Engineering
21604514	Numerical Heat Transfer

Department of Mechanical Engineering

21604515	Thermal Radiation
21604516	Advanced Air-Conditioning
21604517	Design of Thermal Systems
21604518	Environmental Thermal Engineering
21604519	Turbulence
21604520	Non-Newtonian Fluid Mechanics
21604521	Applied Hydraulic Engineering
21604522	Instability Theory
21604523	Advanced Automotive Engineering
21604524	Alternative Energy Engines
21604525	Advanced Thermodynamics
21604526	Phase Change Heat Transfer
21604527	Advanced Refrigeration Engineering
50086787	Advanced Automotive Environment Engineering

Materials, Design and Production

21604531	Advanced Solid Mechanics
21604532	Strength of Materials
21604535	Finite Element Method
21604540	Cutting Process
21604552	Advanced Mechanical Materials
21604573	Theory of Plasticity
21604574	Fracuture Mechanics
21604575	Surface Modeling
21604576	Advanced Machine Design
21604577	Stress Analysis
21604578	Theory of Plates and Shells
21604579	Boundary Element Method
21604580	Materials Behaviors
21604581	Composite Materials
21604582	Solid Modeling
21604583	Optimum Design
21604584	Design for Manufacturing and Assembly
21604585	Mechanical System Design
21604586	Rapid Prototyping
21604587	Computer Aided Manufacturing
21604588	Precision Maching
21604589	Non-traditional Machining Process

21604590	Theory of Elasticity
21604591	Reliability Engineering
21604592	Metal Forming
21604564	Advanced Welding Metallurgy
21604594	Machine vision

Dynamics and Control

21604473	Automatic Control
21604560	Design of Automatic System
21604566	Adaptive Control
21604569	Elastic Wave Theory
21604570	Nonlinear Control
21604572	Mechatronics
21604595	Advanced Dynamics
21604596	Advanced Vibration Engineering
21604597	System Modeling
21604598	Vibration Analysis of Continuous Systems
21604599	Nonlinear Vibration
21604600	Noise Engineering
21604601	Digital Control
21604602	Multi-Input Multi-Output Control
21604603	Robust Control
21604604	Sensors & Actuators
21604605	Intelligent Control System
21604606	Advanced Control Theory
21604607	Human Body Dynamics
21604608	Human Vibrations
21604609	Precision Mechtronic System
21604610	Electromagnetic Actuator Control
50084077	Rotordynamics

Department of Computing

The Department of Computing at Soongsil University was established in 1970 as the first undergraduate program in the computer science-related discipline in the nation. Since then, many excellent engineers have been educated and trained, and many valuable and active research works of high quality have been conducted in the department. In 1995, the department was reorganized into the College of Information Science, the first computer science-oriented college in the nation, by integrating four departments of the university.

Following the successful achievement of the undergraduate computer science program, the graduate program was established in 1999, which was renamed the Department of Computing at the time. Around the time, the major research tracks in the department were expanded into six different sub-fields. The main objective of the Department of Computing is to develop the ability to solve problems based on fundamental theories of computer science. To this end, the department requires students to participate in research projects and to publish papers in various conferences and journals. Through these activities, excellent engineers and scientists can be educated to lead the future of the information industry.

AREAS OF SPECIALIZATION

This program provides a comprehensive approach to advanced study in computer science. It also prepares professionally responsible individuals to be capable of holding a variety of scientific and technical positions in the area of computing applications. Such jobs are found in research and development departments; in federal, state and local government agencies; in computer software development companies; in computer security companies; in Internet, e-commerce and Web development companies; and in companies involved in development of hardware and software products for applications in aerospace, biological, chemical, medical, and genetic research.

The main objectives of the program are: 1) to give students the opportunity to study and attain knowledge in current computer science specialties; 2) to develop student ability to apply computer science problem solving methods and tools to realistic research and industry-related problems; 3) to equip students with the tools and knowledge necessary for contributing to the needs of a high technology society through preparation for continued learning; 4) to prepare students for advanced graduate work in computer science.

The Computer Science Department offers the following degrees and specializations:

MS and PhD degrees in Computer Science

- Computer Architecture Track

Department of Computing

- Computer Communications Track
- Software Engineering Track
- Artificial Intelligence Track
- Multimedia Track

PROGRAM OF STUDY

Teaching is by a variety of lectures and seminars on selected topics. Assessment is by written examination, assessed coursework, presentation, and a thesis.

COURSES

Common Courses

21604240	Software Engineering
21604241	Computer Architectures
21604242	Programming Languages
21604244	Operating Systems
21604245	Numerical Analysis
21604246	Computer Algorithms
21604247	Artificial Intelligence
21604248	Computer Networks
21604250	Databases
21604254	Theory of Computation

21604255	Theory of Automata
21604307	Multimedia System
50228736	Creativity Development

Computer Architecture

21604266	Performance Evaluation of Computer Systems
21604267	Parallel Computer Architectures
21604268	Fault-Tolerant Design Methodology
21604269	VLSI CAD Simulation Methodology
21604293	Digital Systems Simulation
21604270	High Speed Computer Arithmetic
21604271	Systems Test
21604272	Topics in Computer Architectures I
21604273	Topics in Very Large Scale Integration
21604274	Microcomputer Design
21604279	Very Large Scale Integration
21604283	Digital Systems Design
21604285	Supercomputer Architectures
21604290	Digital Signal Processing
21604294	Topics in Computer Architectures II
21604308	Design For Testability
21604311	Network Architecture for Digital Broadcasting System

Computer Communication

21604275	Data Communication
21604281	Cryptography
21604284	Protocol Engineering
21604287	Topics in Computer Network
21604288	Performance Evaluation of Communication Networks
21604289	Broadband Wireless Network
21604291	Topics in Internet Communications
21604292	High Speed Communications
21604295	Coding Theory
21604296	Network Security
21604297	Local Area Networks
21604298	Internet Communications
21604299	Programming for Computer Communications

Department of Computing

21604300	Mobile Communications
21604301	ATM Network
21604302	Network Algorithms
21604303	Topics in Network Security
21604304	Topics in Mobile Communications
21604305	Topics in High-speed Communications
21604306	Information System Security Engineering
21604309	Hacking and Anti-Virus Systems
21604310	Firewall and Intrusion Detection System
21604355	Mobile Computing Protocols
21604365	Information Assurance Engineering
21604369	Topics in Public Key Interchange(PKI) Authentications
21604370	Network Intrusion Protection System
21604371	IPv6 Communications
21604372	Mobile IP Communications
21604373	IPv6 Security Communications
21604374	Network Mobility Communications
21604375	Internet Multicast
21604376	Internet Contents Security
21604377	Topics in Contents Security
21604378	Broadband Routing
21604379	Routing in Wireless Networks
21604382	Topics in Wireless Routing
21604381	Multimedia Application Protocols
50062351	Topics in Electronic Commerce

Systems Software

21604251	Information Retrieval
21604252	Compiler Constructions
21604353	Database Design
21604256	Formal Languages
21604258	Topics in Programming Languages
21604259	Topics in Operating Systems
21604260	Topics in Database
21604261	Topics in Compiler Constructions
21604262	Topics in Parallel Processing
21604263	Operating Systems Design
21604264	Parallel Algorithms

21604265	Topics in Information Retrieval
21604278	Distributed Processing
21608280	Parallel Processing
21604282	Fault-Tolerant Computing
21604343	Implementation Techniques of Database Systems
21604344	Realtime Systems
21604345	Distributes Operating Systems
21604346	Embedded Systems
21604347	Topics in Distributed Processing
21604348	Design of OS for Ubiquitous
21604349	Topics in Middleware
21604350	Topics in Programming
21604351	Topics in Mobile Data Management
21604352	Topics in Mobile Programming
21604345	Design and Implementation of Embedded Operating
21604354	Topics in Modern Operating Systems
50040255	Geometric Algorithms
50228737	Geometric Algorithms II
50237148	Computer Security
50237149	Mobile Security
50237150	Special Topics in Embedded OS

Software Engineering

21604318	Software Development Environment
21604319	Project Management
21604320	Software Design
21604324	Software Quality Assurance
21604325	Systems Analysis Methodology
21604330	Topics in Software Engineering
21604337	Object-Oriented Software Engineering
21604341	Topics in Software Design
21604342	Topics in System Analysis
21604356	Software Process
21604357	Software Requirements Engineering
21604358	Software Architecture
21604359	Software Reuse
21604360	Information Systems Audit
21604361	Management Information Systems

Department of Computing

21604362	Topics in Software Process
21604363	Topics in Management Information Systems
21604364	Topics in Software Testing
21604366	Component Based Software Engineering
21604367	System Engineering
21604368	Information Technology Architecture
21604380	Topics in Knowledge Management

Artificial Intelligence

21604312	Image Processing
21604314	Computer Vision
21604315	Pattern Recognition
21604316	Logic Programming
21604317	Expert Systems
21604321	Natural Language Processing
21604322	Knowledge Base
21604328	Neural Networks
21604332	Machine Learning
21604334	Intelligence Tutoring Systems
21604339	Fuzzy Systems
21604419	Reasoning Systems
21604420	Planning Systems
21604424	Topics in Artificial Intelligence 1
21604423	Data Mining
21604424	Topics in Data Mining
21604425	Semantic Web
21604426	Agent Systems
21604443	Computer Vision System

Multimedia

21604313	Computer Graphics
21604335	Multimedia Database
21604338	Data Compression
21604427	Multimedia Design
21604428	Multimedia Programming
21604429	Multimedia Planning Scenario
21604430	Networked Multimedia

21604431	Multimedia Communication
21604432	HCI(Human Computer Interaction)
21604433	Theory of Visual ART
21604434	Special Effects
21604435	Shape Modeling
21604436	Virtual Reality
21604437	Visualization
21604438	Curves and Surfaces
21604439	Motion Capture
21604440	Kinematics/Dynamics
21604441	Topics in Multimedia I
21604442	Augmented Reality
21604444	Character Animation

DEPARTMENTAL REQUIREMENTS

- Computer Architecture
- Computer Communication
- Systems Software
- Software Engineering
- Artificial Intelligence

MEMBERS OF FACULTY

Name	Position	Degree	Major	E-mail
Hoo-Bong Song	Emeritus Professor	Ph.D.[Chosun Univ.]	System Software	
Chul-Hee Lee	Emeritus Professor	Ph.D.[Chungang Univ.]	Data Communication	
Ki-won Chong	Emeritus Professor	Ph.D.[Univ. of Texas at Arlington]	Software Engineering, project management, electronic commerce	chong@ssu.ac.kr
Sung-Yul Rhew	Professor	Ph.D.[Ajou Univ.]	Software Engineering, data structure, re-engineering and case tools, software quality assurance	syrhew@ssu.ac.kr
Byung-Gi Kim	Professor	Ph.D.[KAIST]	Next generation network, wireless network security, QoS	bgkim@ssu.ac.kr
Chae-Woo Yoo	Professor	Ph.D.[KAIST]	Programming Languages, compiler, human-computer interactio	cwyoo@ssu.ac.kr
Seung-Min Yang	Professor	Ph.D.[Univ. of South Florida]	Realtime embedded systems, operating systems	smyang@ssu.ac.kr
Young-Tack Park	Professor	Ph.D.[Univ. of Illinois at Urbana-Champaign]	Artificial Intelligence, semantic web, ubiquitous agent	park@ssu.ac.kr
Myung-Won Kim	Professor	Ph.D.[Univ. of Texas at Austin]	Artificial Intelligence, data mining, business intelligence	mkim@ssu.ac.kr
Moon-seong Jun	Professor	Ph.D.[Univ. of Marryland at Baltimore County]	Information Security code algorithm, information communications	mjun@ssu.ac.kr
Sang-Ho Lee	Professor	Ph.D.[Northwestern Univ.]	Web databases and web search, database system benchmark and tuning	shlee333@ssu.ac.kr

Name	Position	Degree	Major	E-mail
Young-Song Mun	Professor	Ph.D.[Univ. of Texas at Arlington]	IPv6, mobile internet, Network Security	mun@ssu.ac.kr
Jae-young Choi	Professor	Ph.D.[Cornell Univ.]	Parallel and Distributed processing	choi@ssu.ac.kr
Su-Dong Kim	Professor	Ph.D.[Univ. of Iowa]	Software Engineering, service-oriented architecture	sdkim@ssu.ac.kr
Hoon Chang	Professor	Ph.D.[Univ. of Texas at Austin]	VLSI/SoC design and test, embedded systems, computer structure	hoon@ssu.ac.kr
Seok-Yoon Kim	Professor	Ph.D.[Univ. of Texas at Austin]	Automated design, timing evaluation, Signal/Power integrity	ksy@ssu.ac.kr
Soo-Won Lee	Professor	Ph.D.[Univ. of Southern California]	Artificial Intelligence mechanical learning, data mining	swlee@ssu.ac.kr
Yong-tae Shin	Professor	Ph.D.[Univ. of Iowa]	Computer Network, contents security	shin@ssu.ac.kr
Myung-Ho Kim	Professor	Ph.D.[POSTECH]	Mobile computing, open source software	kmh@ssu.ac.kr
Nam-Yong Lee	Professor	Ph.D.[Mississippi State Univ.]	System engineering, software engineering, electronic commerce system/business information system	nylee@ssu.ac.kr
Chang-Jin Suh	Professor	Ph.D.[Univ. of Massachusetts Amherst]	Sensor network, carrier ethernet, switching, routing theory,BGP	cjsuh@ssu.ac.kr
Gye-young Kim	Professor	Ph.D.[Soongsil Univ.]	Robot vision, pattern recognition, augmented reality	gykim11@ssu.ac.kr
A-Ra Khil	Associate Professor	Ph.D.[KAIST]	Realtime operation System, embedded operating system	ara@ssu.ac.kr

Department of Computing

Name	Position	Degree	Major	E-mail
Hyeon-Suk Na	Associate Professor	Ph.D.[POSTECH]	Computational Geometry, development/ analysis of algorithms, information theory	hsnaa@ssu.ac.kr
Sang-Jun Lee	Associate Professor	Ph.D.[Seoul National Univ.]	Database, mobile data processing, P2P systems	sangjun@ssu.ac.kr
Ji-man Hong	Associate Professor	Ph.D.[Seoul National Univ.]	operating systems, embedded software, real-time systems, fault tolerant system, sensor network	jiman@ssu.ac.kr
Dong-Joo Park	Associate Professor	Ph.D.[Seoul National Univ.]	Database, multimedia database, embedded software	djpark@ssu.ac.kr
Kyu-Baek Hwang	Associate Professor	Ph.D.[Seoul National Univ.]	Machine learning, natural language processing, bioinformatics	kbhwang@ssu.ac.kr
Jeong-Hyun Yi	Assistant Professor	Ph.D.[Univ. of California, Irvine]	Network security, mobile security	jhyi@ssu.ac.kr
Ik-Soo Kim	Assistant Professor	Ph.D.[Soongsil Univ.]	Information protection, web computing	skycolor@ss.ssu.ac.kr
Jun-Kyung Seong	Assistant Professor	Ph.D.[Seoul National Univ.]	Computer graphics, computational neuroimage analysis	seong@ssu.ac.kr
Wong Kok Seng	Assistant Professor	MS[Malaysia University of Science & Technology]	Web computing, data mining, collaborative computing, telemedicine, data privacy and security	kswong@ssu.ac.kr
Yap Chee Een	Assistant Professor	MS[Robert Gordon University, Scotland]	Information Systems	ceyap@ssu.ac.kr

Department of Industrial & Information Systems Engineering

03

Engineering

- A variety of majors that offer competitive educational programs and research opportunities.
- M.S. and Ph.D. courses that are exciting and academically challenging.
- Balanced courses for academic research and practical application of knowledge to industries.

AREAS OF SPECIALIZATION

Industrial Systems Engineering

This field provides a foundation in modern techniques of industrial systems engineering for graduates with degrees in industrial engineering, computer science or engineering, or management. Operations Research, Manufacturing Systems Engineering, and Quality and Management Engineering are included in this field.

Information Systems Engineering

An Information system (IS) is a group of five components, hardware, software, data, procedure, and people that interact to produce management information. This field is concerned with the development and use of ISs. Management Information Systems, e-Business Systems, Software Engineering, and Network Systems are included in this field.

Human-Computer Interaction

HCI aims at improving the interaction between users(human) and computers(machines that contain computing elements) by increasing the usability of user interfaces, including software and hardware. HCI is an interdisciplinary study that utilizes theories and methodologies from human studies(e.g., psychology and sociology), computer science, and other fields.

PROGRAM OF STUDY

Teaching is performed by a variety of lectures and seminars. Assessment methods include written examination, assessed coursework, presentation, and a dissertation. Various tools and research resources are utilized for effective teaching.

Each major offers a variety of courses which are all elective subjects.

COURSES

O.R.(Operations Research)

21605671	Advanced Linear Programming
21604672	Nonlinear Programming
21604673	Dynamic Programming
21604674	Integer Programming
21604675	Network Theory
21604676	Queueing Theory
21604677	Multiobject Programming
21604678	Game Theory
21604679	Seminar in Operations Research
21604680	Advanced Optimization

Manufacturing Systems Engineering

21604748	Production Planning and Control
21604649	Inventory Theory
21604650	Logistics Management System
21604651	Scheduling Theory
21604652	Seminar in Production Management
21604653	Manufacturing Systems Simulation
21604654	Computer Based Production System
21604655	Modelling and Design of Flexible Manufacturing Systems
21604658	Advanced Topics in Concurrent Engineering
21604659	Manufacturing Facility Analysis & Design
21604660	Analytical Models in I.E

21604661	Automated Manufacturing Information Systems
21604662	Algorithm
21604663	Performance Analysis of Manufacturing Systems
21604664	Customer-Driven Manufacturing
21604665	Advanced Intelligence in Design and Manufacturing
21604666	Advanced Topics in Automated Manufacturing Systems
21604667	Engineering/ Business Process Mapping
21604668	Discrete Event Dynamic Systems
21604669	Environmental Conscious Manufacturing Systems
21604670	Advanced Topics in Systems Engineering
21604671	Advanced Topic in Factory Automation
21604672	Automated Storage/ Retrieval System
21604673	Graph Theory and Application
21604674	Advanced Modelling and Analysis on Supply Chain Network
21604675	Intelligent Manufacturing System
21604676	Production Information System
21604677	Manufacturing System Modelling and Analysis
21604678	Quick Response Manufacturing System
21604679	Manufacturing Process Design and Control
21604680	Industrial Telerobotics

Quality and Management Engineering

21604659	Cost Estimation for Engineering
21604660	Advanced Engineering Economy
21604661	Economic & Multi-attribute Analysis of Industrial Project
21604662	Research & Development Management
21604663	Topic in Management Engineering
21604666	Quality Management
21604681	Stochastic Processes
21604682	Advanced Experimental Design
21604683	Quality Engineering
21604684	Software Reliability Analysis
21604685	Decision Analysis
21604686	Advanced Regression Analysis
21604694	Statistical Simulation
21604695	Reliability Engineering
21604756	Applied Time Series Analysis
21604757	Statistical Analysis of Life Data

Management Information Systems

21604687	Advanced Management Information Systems
21604701	Advanced Information Technology
21604702	IT Consulting and Professional Services
21604669	Advanced Systems Analysis & Design
21604733	Knowledge Management Systems
21604734	Business Innovation Seminar
21604735	Information Systems Architecture
21604736	Data Warehouse and Applications
21604738	Customer Relationship Management
21604744	On-Line Analytical Processing Solutions I
21604745	On-Line Analytical Processing Solutions II
21604746	On-Line Analytical Processing-Multidimensional Expressions

E-Business

21604705	E-Commerce Management
21604706	E-Commerce Technology
21604707	Internet Information Systems
21604708	Data Mining
21604747	Accounting Information System
21604709	Internet Marketing Fundamentals
21604710	Web-based Information Architectures
21604712	Advanced Topics in e-Business
21604739	Human Aspects in e-Business systems
21604740	Business Process Management

Network System

21604720	Computer Networks
21604713	Network Programming
21604714	Network Security
50084705	Convex Optimization
21604719	Advanced Algorithm
21604717	Selected Topics in the Telecommunication Network Design
21604802	Transportation System Analysis
21604721	Mathematical Methods for the Industrial and Information Systems Engineering
21604722	Metaheuristic Algorithms

Software Engineering

21604723	Computer Algorithm
21604724	Integrated Development of Software and Hardware
21604725	Advanced Topics of Management of Software Development
21604726	Modeling and Design of Object Oriented Software
21604727	Data Mining and Machine Learning
21604670	Knowledge Based System
21604729	Development of Knowledge Management System
21604730	Design of Software for AI
21604731	Development of Expert system and Software

HCI(Human-Computer Interaction)

21604781	Human-Computer Interaction
21604782	Usability Engineering
21604783	Cognitive Engineering
21604784	Advanced Topics in HCI
21604785	HCI Research Methodology

DEPARTMENTAL REQUIREMENTS

All courses included in the curriculum are optional. Therefore, each student can take a variety of subjects during his or her coursework.

MEMBERS OF FACULTY

Name	Position	Degree	Major	E-mail
Choi, In Soo	Professor	Ph.D. (Seoul National Univ.)	MIS	ischoi@ssu.ac.kr
Chung, Byung Hee	Professor	Ph.D. (Seoul National Univ.)	Production Management	bhchung@ssu.ac.kr
Lim, Tae Jin	Professor	Ph.D. (Cornell Univ.)	Applied Statistics	tjlim@ssu.ac.kr
Cho, Moonsoo	Professor	Ph.D. (Univ. of Iowa)	Concurrent Engineering	jmsu@ssu.ac.kr
Lee, Gun Ho	Associate Professor	Ph.D. (Univ. of Iowa)	Software Engineering	ghlee@ssu.ac.kr
Park, Tae Hyung	Associate Professor	Ph.D. (Virginia Tech.)	Network Systems	tpark@ssu.ac.kr
Yoon, Suk-Hun	Associate Professor	Ph.D. (Pennsylvania State Univ.)	O.R.	yoons@ssu.ac.kr
Kim, Dongsoo	Associate Professor	Ph.D. (Seoul National Univ.)	e-Business	dskim@ssu.ac.kr
Hwang, Wonil	Assistant Professor	Ph.D. (Purdue Univ.)	Human-Computer Interaction	wonil@ssu.ac.kr
Son, Jae Dong	Assistant Professor	Ph.D. (Univ. of Tsukuba)	Social Systems Engineering	son88@ssu.ac.kr

Department of Architecture and Architectural Engineering

The graduate program in the Department of Architecture nurture diverse and competent professionals in the field of architecture, well versed in both theoretical and practical knowledge, who can match the challenging paradigms of globalization and specialization in today's knowledge- and information-based world. In order to meet the society's current needs, the program encourages creative inquiries into contemporary problems of architectural design and engineering, while maintaining a balance between professional training and research.

AREAS OF SPECIALIZATION

- Architectural Design & Programming
- Urban Design & Planning
- Architectural History & Design Theory
- Structural Engineering
- Building Materials
- Construction Management/Technology
- Building Environment & Green Building Materials

The graduate program in the Department of Architecture is designed to train students as competent professionals in the field of architecture. The Department provides students with opportunities to study the ordered relationship of people and the environment, as well as to cultivate their practical abilities as architects and engineers. Through advanced training in architectural practice and engineering theories, students will be guided to complete their dissertations for Master's or Doctoral degrees.

PROGRAM OF STUDY

In-depth knowledge and practical abilities in specialized fields are taught through lectures and seminars. Achievements of students are assessed through coursework, research presentation, written examination, and a dissertation.

COURSES

Common Courses

21604828	Advanced Architecture Design I
21604829	Themes in History of Korean/Far Eastern Architecture
21604830	Themes in History of Western Architecture
21604831	Architectural Problem Solving Methodology
21604832	Structural Planning
21604833	Building Materials I
21604834	Building Systems Design
21604835	Energy-Conscious Design

Architectural / Urban Design, Planning, Theory / History

21604837	Advanced Architectural Design II
21604838	Advanced Architectural Design III
21604839	Design & Planning of Educational Facilities I
21604840	Seminar in Architecture I
21604841	Seminar in Architecture II
21604842	Design Methodology
21604843	Main Currents of Modern Movement in Architecture
21604844	Design & Planning of Educational Facilities II
21604845	Planning & Design of Housing for Disabled & Celibate People
21604846	Advanced Theories of Residential Planning
21604847	Efficient Use of Space in Multi-Family Housing
21604848	Information in Architecture
21604849	Design of Building Elevations

21604859	Readings in Architecture Theories I
21604851	Contemporary Theory and Criticism of Architecture
21604852	Contemporary Architecture in Non-Western World
21604853	Critical Monuments of Modern Architecture
21604854	Advanced Theories of Interior Architectural Planning
21604860	Theories of Urban & Regional Planning
21604861	History and Theories of Urban From Case Studies in Urban Design
21604862	Case Studies in Urban Design
21604863	Theory of Urban Development & Renewal
21604864	Transportation Planning
21604865	New Town Planning
21604866	Future of Metropolis
21604867	Computer Programming Techniques for Architectural Problems
21604868	Computer Graphics I
21604869	Computer Graphics II
21604870	Architectural Design Modelling System
21604871	Data Structure for Architectural Design
21604877	Database & Its Application to CAAD
21604878	Studies in Townscape Design
21604879	Studies in Campus Planning
21604880	Architecture and Politics
21604881	Housing Typology and Urban Form
21604882	Reading in Architectural Theories II
21604883	Professional practice in Architecture

Structural Engineering, Building Materials, Construction Materials/Technology

21604885	Advanced Mechanics/Materials
21604886	Theory of Buckling
21604887	Theory of Elasticity
21604888	Energy Method of Structural Analysis
21604889	Theory of Plasticity
21604890	Matrix Structural Analysis
21604891	Finite Element Method
21604892	Non-Linear Problems in Structural Analysis
21604893	Computer Method in Structural Engineering
21604894	Structural Dynamics
21604896	Seismic Design of Buildings
21604897	Advanced Steel Structure

Department of Architecture and Architectural Engineering

21604898	Advanced Design of Steel Structure
21604899	Hybrid Structures
21604900	Advanced Design of Reinforced Concrete
21604901	Advanced Reinforced Concrete Structure
21604902	Design of Pre-Stressed Concrete Structure
21604903	Seminar I in Architectural Structures
21604904	Seminar II in Architectural Structures
21604905	Experimental Stress Analysis
21604906	Building Materials II
21604907	Experimental Studies for Building Materials
21604908	Evaluation of Material Performance
21604909	Advanced Construction Technology
21604910	Pre-Fabricated Building Construction
21604911	Advanced Construction Management
21604912	Building Economics
21604913	Construction Management Technology
21604914	Construction Quality Management
21604915	Construction Project Management
21604916	Facilities Management
21604917	Construction Management Research Seminar
21604918	Construction Business Administration
21604919	Computer Application for Construction
21604920	Construction Cost Management
21604921	Construction Performance and Productivity Improvement
50235561	Technology in Architecture
50235562	Construction Management
50235563	Construction Cost Estimation & Control
50235564	Construction Contracting and Legal Aspects
50235565	Criticism of Architectural Engineering
50235566	Construction Risk Management
50235567	Construction Material Management and Procurement
50235569	Theory of Preconstruction
50235571	Construction Project Financing
50235572	Building Maintenance
50235573	Construction Safety Management
50235574	Construction Decision Making
50235575	Construction Law & Policy
50235576	Construction Information Management
50235577	Construction Development Project

50084079	Theory of architectural Environment
50084080	Advanced Studies on Building Thermal Environment
50084081	Advanced Studies on Indoor Air Quality
50084082	Advanced Studies on Building Environmental Control System
50084083	Advanced Studies on Green Building Materials
50084084	Sustainable Building Environmental Control System Seminar
50084085	Advanced Studies on Ecological Architecture
50084096	Building Energy Performance Analysis
50235578	Seminar in Building Energy Simulation I
50235579	Seminar in Building Energy Simulation II
50235580	Seminar in Green Building I
50235581	Seminar in Green Building II
50235582	Seminar in Green Building Materials I
50235583	Seminar in Green Building Materials II
50235584	Studies in Environmental Modeling & Simulation
50235585	Advanced Building Environmental Technology
50235586	Advanced Studies on Passive House
50235587	Advanced Studies on Renewable Energy in Building
50235588	Advanced Studies on Conservation Energy in Building

DEPARTMENTAL REQUIREMENTS

Students seeking Master's degree in all specialized fields are required to complete at least 24 credits from the Department's courses and submit an acceptable dissertation. Ph.D. degrees are awarded upon satisfactory completion of an approved program of at least 36 credits from the Department's courses and a dissertation research, writing, and defense.

Department of Architecture and Architectural Engineering

MEMBERS OF FACULTY

Name	Position	Degree	Major	E-mail
Kim, Jong-Rak	Professor	Dr.Eng. (Tokyo Institute of Technology)	Structural Engineering; Street Structure; Wind Load and Structural Response	jrkim@ssu.ac.kr
Yoon, Choon-Sup	Professor	Ph.D. (Univ. of Edinburgh)	Architectural Design	csyoon@ssu.ac.kr
Choi, Oan-Chul	Professor	Ph.D. (Univ. of Kansas)	Structural Engineering; RC Structural / Composite Structural	occhoi@ssu.ac.kr
Lee, Sang-Jin	Associate Professor	MA. (Univ. of Michigan)	Architectural Design	sjl54@ssu.ac.kr
Choi, Yoon-Ki	Associate Professor	Ph.D. (Seoul National Univ.)	Construction Management	ykchoi@ssu.ac.kr
Kim, Hong-Gi	Associate Professor	Dipl.-Ing (Architekt Univ. of Dortmund)	Architectural Design	hgkim@ssu.ac.kr
Kim, Sumin	Assistant Professor	Ph.D. (Seoul National Univ.)	Building Environment, Green Building Materials	skim@ssu.ac.kr
Choi, Won-joon	Assistant Professor	Ph.D. (Seoul National Univ.)	Architectural Theory & History	choi.wonjoon@ssu.ac.kr
Choi, Kyoung-Kyu	Assistant Professor	Ph.D. (Seoul National Univ.)	Structural Engineering; Earthquake Engineering; RC Structures	kkchoi@ssu.ac.kr
Kim, Jung-In	Assistant Professor	Ph.D. (UC Berkeley)	Architectural Design & Urban Theory	jungin@ssu.ac.kr

Department of Information and Telecommunication Engineering

- The competitive national reputation;
- Extensive research programs from which most students are financially supported.
- Excellent and various academic fields.
- MS and Ph.D courses which are exciting and academically challenging.

AREAS OF SPECIALIZATION

- **MS in Information & Telecommunication Engineering**
- **Ph.D in Information & Telecommunication Engineering**

The goal of the Department of Information and Telecommunication is to educate high-quality experts and mid-level managers with excellent capabilities in the area of information and telecommunication under the educational motto of Soongsil University, "Truth and Service".

PROGRAM OF STUDY

Teaching is by a variety of lectures, seminars, and term projects. Assessment is by written examination, assessed coursework, presentation, term projects, and a dissertation. The final grade is awarded by evaluating various modules. To become Master candidates or Ph.D candidates, He/her should pass the Qualifying examination.

COURSES

Communications and Signal Processing

21604965	Multimedia Communications
21604970	Speech Communications
21604976	Speech Information Processing
21604972	Digital Signal Processing
21604974	New-Media Communications
21604975	Speech Synthesis Techniques
21604977	Speech Compression Coding
21604981	Satellite Communication Theory
21604984	Probability, Statistics and Random Signal Analysis
21604985	Communication Theory
21604986	Signal Transmission Techniques in Mobile Communications
21604987	Mobile Communication Systems
21604997	Signals and Systems
21604998	Probability and Statistics
21604999	Linear System Theory
21605000	Analog Communications
21605001	Digital Communications
21605002	Source Coding and Decoding
21605003	Audio Coding
21605004	Special Topics in Communication Circuit Analysis
21605005	Spread Spectrum Communication Systems
21605006	Code Division Multiple Access systems
21605007	Knowledge Information Processing Systems
21605008	System Modeling and Simulation
21605009	Analysis of Digital Systems
21605010	Biomedical Electronics
21605011	Image Information Comprehension
21605012	Optimization Theory
21605013	Detection, Estimation and Filtering
21605014	Estimation and Detection Theory
21605015	Time Series Analysis
21605016	Communication Signal Processing
21605017	Nonlinear Signal Processing
21605018	Stochastic Signal Processing
21605019	Array Signal Processing

21605020	Sub-band Coding & Signal Processing
21605021	Design and Application of Fuzzy and Neural Computer
21605022	Exchange Systems
21605023	Electronic Exchange Systems
21605024	Realistic Telecommunications
21605025	Multimodal Communications
21605026	Special Topics in Digital Signal Processing
21605027	Sound Effect Systems
21605028	Image Coding
21605029	Adaptive Filter Theory
21605030	Automatic Translation Systems
21605031	Ultrasonic Communication Systems
21605032	Underwater Acoustic Signal Processing
21605033	Navigating Communications
21605034	Information Theory
21605035	Channel Coding Theory
21605036	Communication Systems
21605037	Satellite Transponder
21605038	Signal Exchange Systems
21605039	Special Topics in Mobile Communication Systems
21605040	Special Topics in Underwater Acoustic Communication
21605043	Underwater Acoustic Communication and Signal Processing
21605080	Orthogonal Frequency Division Multiplexing Systems
21605042	Advanced Modulation and Demodulation Technology
50235925	Radar Signal Processing

Devices and Integrated Circuits

21605047	Analog Integrated Circuit Design
21605048	Digital Integrated Circuit Design
21605049	Advanced Integrated Circuit Design
21605050	Special Topics in Integrated Circuits
21605051	VLSI Design
21605052	ASIC Design
21605053	Digital System Design
21605054	Solid State Electronics
21605055	Special Topics in Physical Electronics
21605056	Semiconductor Devices 1
21605057	Semiconductor Devices 2

21605058	Device Electronics for Integrated Circuits
21605059	Semiconductor Device Modeling
21605060	Microwave Semiconductor Devices
21605061	Special Topics in Semiconductor Devices
21605062	Integrated Circuit Fabrication Process
21605063	Magnetic Materials
21605064	Special Topics in Magnetic Materials
21605065	Magnetic Computer and Communication Devices
21605066	Magnetic Information Storage Engineering
21605067	Optical Data Storage Engineering
21605068	Computer Data Storage Engineering
21605069	SoC Architecture
21605070	SoC Design Methodology
21605071	Design of Radio-Frequency Integrated Circuits
21605072	Design of Analog/Mixed Signal
21605046	Embedded system design
21605073	Embedded Software Programming
21605074	IP Design and System Integration
21605075	Multimedia System Design
21605076	Full Custom Design
21605077	High Performance Memory Architecture Design
21605078	Communication System Design
21605079	Low Power System Design
21605081	Special Topics in Digital System Design
50235952	Device Physics for Various Display Technologies

Microwave and Lightwave

21604979	Special Topics in Antennas
21605106	Microwave Circuits
21605045	Electromagnetic Fields
21604983	Numerical Techniques for Microwave
21604992	Semiconductor Laser Diodes
21604993	Optical Communication Systems
21604994	Fiber-Optic Networks
21604995	Quantum Electronics
21605082	Radiation, Propagation and Scattering of Electromagnetic Waves
21605083	Numerical Methods in Electromagnetics
21605084	Computer Aided Design for Microwave Components

21605085	Special Topics in Microwave Technology
21605086	Special Topics in CAD for Microwave and Millimeter-Wave Circuit
21605087	Special Topics in Microwave Systems
21605088	Numerical Techniques for Microwave and Millimeter-Wave Passive Structures
21605089	Nonlinear Microwave Circuits
21605090	Techniques against Electromagnetic Interference
21605091	Optical Electronics
21605092	Nonlinear Optics
21605093	Optics
21605094	Special Topics in Electromagnetic Waves
21605095	Radar Systems
21605096	Propagation Theory
21605097	Analysis and Design of Antennas
21605098	Special Topics in Wireless Communications
21605099	Satellite Communication Systems
21605100	Special Topics in Electromagnetic Compatibility
21605101	Nonlinear Fiber Optics
21605102	Fiber-Optic Sensors
21605103	Integrated Optics
21605104	Photonic Switching
21605105	Photonics
21605108	Special Topics in Optical Electronics
21605107	Special Topics in Optical Communication Systems

Computer, Automation and Networks

21605044	Computer Vision
21604988	Special Topics In Information Communications
21604996	High Speed Communication Networks
21604990	Data Communicatons
21605109	Introduction to Software
21605110	Operating Systems
21605111	Introduction to Compilers
21605112	Introduction to Databases Systems
21605113	Computer Architecture
21605114	Advanced Computer Architecture
21605115	Parallel Processing
21605116	Pattern Recognition
21605117	Artificial Intelligence System Design

21605118	Information Retrieval
21605119	Multimedia Information Retrieval
21605120	Special Topics in Multimedia Information Retrieval
21605121	Multimedia User Interface
21605122	Special Topics in Multimedia Technology
21605123	Multimedia System Design
21605124	Computer Graphics
21605125	Graph Theory and Application
21605126	Geometrical Modelling
21605127	Special Topics in Computer Vision
21605128	Special Topics in Image Processing
21605129	Medical Image Processing
21605130	Special Topics in Medical Image Processing
21605131	Robot Sensor Design and Application
21605132	Robotics and Automation Systems
21605133	CAD/CAM
21605134	Electronic Instrumentation and Design
21605135	Linear Feedback Control Systems
21605136	Nonlinear Control Systems
21605137	Modern Control System Design and Application
21605138	Adaptive Control
21605139	Optimal Control
21605140	Stochastic Control
21605141	Intelligence Control
21605142	Digital Control Systems
21605143	Distributed Control Systems
21605144	Real-Time System Design and Analysis
21605145	Special Topics in Real-Time Systems
21605146	Queuing Theory and Application
21605147	Traffic Structures
21605148	Protocol Engineering
21605149	Internetworking
21605150	Wireless Data Communications
21605151	Wireless Networks
21605152	Network Application Techniques
21605153	Network Security
21605154	Special Topics in Networks
21605155	Special Topics in Network Analysis
21605156	Internet Networking Technology

21605157	Special Topics in Internet
21605158	Artificial Intelligence
21605159	Expert Systems
21605160	Image Processing
21605161	Teleconferencing Systems
21605162	Special Topics in Pattern Recognition
21605163	Distributed Computing Systems
21605164	Computer Network Design and Analysis
21605165	Network Programming
21605166	Computer Networks
21605188	System Software Programming
21605168	Internet Computing Systems
21605176	Special Topics on Optical Networks
21605170	Introduction to Information Security
21605171	Cryptography
21605172	Special Internet Security Technologies
21605173	Security in Wired and Wireless Internet
21605174	Mobile Computing Systems
21605175	Design and Implementation of Embedded Systems
21605167	Mobile Robot
21605169	Special Topics on Mobile Robot
21605177	Special Issues on Information Security
21605178	Standards on Information Security
21605179	Service and Policy on Information Security
21605041	Next Generation Mobile Communication Networks
21605180	Ubiquitous Networks
21605181	Next Generation Network Technology
21605182	Special Topics in Mobile/Wireless Networks
21605183	Special Topics in Multimodal Information Transformation Technology I
21605184	Special Topics in Multimodal Information Transformation Technology II
21605185	Special Topics in Multimodal Information Transformation Technology III
21605186	Internship
21605187	Life and Leisure Robot
50124697	Patent and Information Analysis
50235953	IT Convergence Applications
50235954	IT Convergence Systems

DEPARTMENTAL REQUIREMENTS

Specialized Fields :

- Communications and Signal Processing
- Devices and Integrated Circuits
- Microwaves and Lightwave
- Computer, Automation, and Networks

Master Course

- **1st Semester** : 3 courses in a specialized field
- **2st Semester** : 3 courses in a specialized field
- **3rd Semester** : 2 courses in a specialized field, Qualifying Exam
- **4th Semester** : At least 1 presentation in domestic or international conference, Dissertation

MEMBERS OF FACULTY

Name	Position	Degree	Major	E-mail
Yang, Seung-In	Professor	Ph.D. (KAIST)	Microwaves and Antennas	
Bae, Myung-Jin	Professor	Ph.D. (Seoul National University)	Speech Communication Engineering; Mobile and Handheld Communication; Sound Engineering	
Kim, Boo-Gyoun	Professor	Ph.D. (Univ. of Southern California)	Electromagnetic Wave Application ;Optical Devices and Sensors	
Chung, Kyusik	Professor	Ph.D. (Univ. of Southern California)	Network Computing and Security	
Chung, Sun-Tae	Professor	Ph.D. (Univ. of Michigan)	Embedded and Real-Time System	
Hahn, Hernsoo	Professor	Ph.D. (Univ. of Southern California)	Sensor Fusion ;Robot Vision	

Name	Position	Degree	Major	E-mail
Song, Inchaе	Professor	Ph.D. (Univ. of California, Los Angeles)	Semiconductor Devices and Integrated Circuits	
Seo, Chulhun	Professor	Ph.D. (Seoul National University)	Wireless Communication and Energy Transfer	
Shim Taebo	Professor	Ph.D. (Louisiana State University)	Physical Oceanography; Underwater Acoustics	
Kim, Young-Han	Professor	Ph.D. (KAIST)	Computer Network	
Shin, Jong-Dug	Professor	Ph.D. (Texas A&M Univ.)	Fiber-Optic Communication Systems and Networks	
Shin, Yoan	Professor	Ph.D. (Univ. of Texas at Austin)	Wireless Communications Systems and Communication Signal Processing	
Lee, Chanho	Professor	Ph.D. (Univ. of California, Los Angeles)	Digital System Design	
Lee, Won-Cheol	Professor	Ph.D. (Polytechnic Univ.)	Mobile Communication Systems; Digital Signal Processing	
Im, Sungbin	Professor	Ph.D. (University of Texas at Austin)	Digital Communication Systems and Higher-Order Signal Processing	
Lee, Jaejin	Professor	Ph.D. (Georgia Institute of Technology)	Channel Coding ;Storage System	
Cha, Hyungtai	Professor	Ph.D. (Univ. of Pittsburgh)	Video; Audio Signal Processing	
Kim, Dongsung	Professor	Ph.D. (Univ. of Southern California)	Medical Imaging and Computer Vision	
Kim, Jonghoon	Professor	Ph.D. (Northwestern Univ.)	Optic and Wireless Communication Systems	
Jung, Souhwan	Professor	Ph.D. (Univ. of Washington)	Network Security	
Moon, Yong	Associate Professor	Ph.D. (Seoul National University)	Integrated Circuits Design	

Department of Information and Telecommunication Engineering

Name	Position	Degree	Major	E-mail
Hong, Min-Cheol	Associate Professor	Ph.D. (Northwestern Univ.)	Video/ Image Processing and Visual Communication	
Yoo, Myungsik	Associate Professor	Ph.D. (State Univ. of New York at Buffalo)	Computer Network	
Wee, Jae-Kyung	Associate Professor	Ph.D. (Seoul National University)	CMOS Circuit Design and System-In-Package Design	
Lee, Seongsoo	Associate Professor	Ph.D. (Seoul National University)	Soc Design	
Han, Youngjoon	Associate Professor	Ph.D. (Soongsil Univ.)	Robot Vision	
Chung, Yun-Won	Associate Professor	Ph.D. (KAIST)	Wireless Networks; Mobile Networks	
Shin, Hyun-Chool	Assistant Professor	Ph.D. (POSTECH)	Neural Engineering and Neural Signal Processing	
Shin, Oh-Soon	Assistant Professor	Ph.D. (Seoul National University)	Communication theory; Wireless communication systems; signal processing for communications	
Park, Changkun	Assistant Professor	Ph.D. (KAIST)	RF Integrated Circuits and Systems	
Kim, Kanghee	Assistant Professor	Ph.D. (Seoul National University)	Real-Time Embedded Systems	
Lee, Hojin	Assistant Professor	Ph.D. (University of Michigan)	Low Power Thin-film Transistors and Circuits for AMOLED and MEMS Displays	
Choi, Seung-Chul	Emeritus Professor	M.S. (Texas A&M Univ.)	Electronic Circuit and Data Communication	
Lee, Kwang-Hyung	Emeritus	Ph.D. (Chungang Univ.)	Computing and Signal Processing	
Jo, Soonchul	Emeritus	Ph.D. (Carnegie Mellon Univ.)	Information Storage and Magnetic Devices	

Department of Digital Media

The main goal of the Department of Digital Media is to incubate creative manpower for digital media industry and the fields of culture and art. The activity of the department centers around converging art with technology and abstracting digital media content from its traditional representations, thereby helping to create leading-edge areas such as digital media. The success of this agenda is currently leading into an increasing focus on how digital information overlaps the everyday physical world. The department takes the lead in collaboration between academia and industry and between art and technology, and provides a unique environment to explore research and applications, regardless of traditional divisions among disciplines. The department is a creative ecosystem, where the viable and interdependent flow of people, projects, ideas and applications is dedicated to the exploration and the expansion of people's ability to use digital media to connect to one another and influence the world around them.

The faculty group of the department consists of 15 professors and 15 Ph.D. staff members for research and teaching. Also, more than 100 graduate students working on Master and Ph.D. degrees conduct intensive researches with faculty members.

AREAS OF SPECIALIZATION

- Media Engineering
- Contents Engineering
- Media Arts

PROGRAM OF STUDY

Acquisition of core knowledge is achieved mainly through lectures and seminars, practical classes and demonstrations. More specialised and detailed knowledge is gained through preparation for coursework assignments, working on projects and theses, and through reflection and discussion in seminars. Assessment is principally through mid-term and end-of-semester written examinations and coursework assignments (mainly media projects, seminar & tutorial presentations) which assess deeper understanding and extended argument, as well as more specific knowledge and approaches. All graduate students must pass all required courses and qualify examinations and write and defend a master's thesis for M.E degree and Ph.D thesis for Ph.D. degree. Each thesis is evaluated by more than three faculty members, at least one of whom is not an instructor in the program.

COURSES

Common Courses

21605208	Introduction to Digital Media
21605209	Digital Media Design
21605210	Digital Media Marketing and Management
21605213	Visual Language and Media
21605211	Human and Computer Interaction
21605212	Independent Study
21605215	Introduction to Digital Media Technology Policy
21605216	Introduction to Digital Media Industry
50074226	The Research Method of Cultural Industries

Media Engineering

21605217	Digital Image Processing
21605218	Data Compression
21605219	Multimedia Data Mining
21605220	Distributed Multimedia
21605221	Multimedia System
21605241	Multimedia communication
21605222	Internet Media
21605223	Pattern Recognition
21605224	Computer Vision
21605226	Computer Vision Seminar
21605226	Ubiquitous Computing
21605227	Advanced Computer Graphics
21605228	Topics in Computer Graphics

21605229	Virtual Reality
21605230	Theory of 3D modeling
21605231	Realtime Rendering
21605232	Digital Broadcasting System
21605233	Data Broadcasting
21605234	Digital Home Network
21605235	Augmented Reality
21605236	Augmented Reality Seminar
21605237	Concentrated Seminar for Multimedia
21605238	Artificial Intelligence
21605239	Concentrated Seminar for Artificial Intelligence
21605214	Algorithm
21605298	Global Illumination
21605242	Advanced Pattern Recognition
21605246	Non-photorealistic Rendering
21605247	Shader Programming
21605248	3D Modeling Seminar
21605244	Animation Algorithm Seminar
21605249	Real-time Rendering Seminar
21605245	Virtual Reality Seminar
21605243	Image-based Rendering Seminar
21605252	Volume Rendering
21605253	Image Based Rendering
21605254	GPU programming
50086802	Data Mining
50086804	Computational Photography
50116280	Digital Image Processing Seminar

Contents Engineering

21605255	Digital Contents Engineering
21605256	Computer Music
21605257	Sound Design
21605258	Digital Media Retrieval
21605259	Digital Security
21605260	Digital Right Management
21605261	Digital Broadcasting Seminar
21605262	Contents Design for Digital Broadcasting
21605263	Game Theory
21605264	Network Game

Department of Digital Media

21605267	Mobile Contents Production
21605265	Game Engineering
21605266	Seminar for Game
21605270	Digital Actor Theory
21605268	3D Animation Production
21605271	Advanced Animation
21605269	Human Body Animation
21605272	Advanced Media Production
21605273	Advanced Computer Music & Sound Production
21605274	Advanced Interactive Media Production
21605250	Computer Graphics Special Effects
21605276	Documentary Theory and Practice
50235617	Social Network

Media Art

21605277	Media Art Seminar
21605278	Media Art Seminar
21605279	Digital Media Creation Theory
21605282	Interactive Story Telling Theory
21605283	Information Visual Expression
21605281	Digital Media and Arts
21605280	Digital Media Advertisement
21605284	Principles of 2-D Design & Plastics
21605285	Visual Media & Expression
21605286	3D Spatial Design and Plastics
21605287	Theory of Color and Lighting
21605288	Theory of Sound & Music
21605289	Design in Digital Environment
21605290	Storytelling & Scenario for Contents
21605291	Contents Planning
21605292	Advanced Research on Media Art
21605292	Media Information Design
21605294	Advanced Web Design
21605295	Cognitive Science Seminar
21605296	Media Aesthetics and Theory Seminar
21605297	Media Aesthetics and Theory Seminar
21605275	Introduction to Film Art
21605299	Advanced Film Art
21605251	Media Art Authoring Techniques

DEPARTMENTAL REQUIREMENTS

Students can choose compulsory courses among common courses offered at the department. students can select optional courses from among 4 course lists established according to the requirements of a particular major discipline, a special subject of study.

The followings are core classes of 4 Major course categories.

- **Common** : Introduction to Digital Media, Digital Media Design, Digital Media Marketing and Management, Human and Computer Interaction,
- **Media Engineering** : Digital Image Processing, Multimedia System, Pattern Recognition Computer Vision, Ubiquitous Computing, Advanced Computer Graphics, Realtime Rendering Augmented Reality, Artificial Intelligence, Algorithm
- **Contents Engineering** : Digital Contents Engineering, Computer Music, Game Theory, Mobile Contents Production, 3D Animation Production, Computer Graphics Special Effects, Documentary Theory and Practice
- **Media Art** : Media Art Seminar, Interactive Story Telling Theory, Principles of 2-D, Design & Plastics, 3D Spatial Design and Plastics, Media Aesthetics and Theory Seminar, Introduction to Film Art, Media Art Authoring Techniques

MEMBERS OF FACULTY

Name	Position	Degree	Major	E-mail
Choi, Hyung-Il	Professor	Ph.D. (Univ. of Michigan)	Computer Vision	hic@ssu.ac.kr
Lim, Young-Hwan	Professor	Ph.D. (Northwestern Univ.)	Multimedia	yhlim@ssu.ac.kr
Song, Kwanho	Professor	Ph.D. (Kwangwoon Univ.)	Internet Media	khsong@ssu.ac.kr
Paik, Doowon	Professor	Ph.D. (Univ. of Minnesota)	Image Processing, Algorithm	apaik@ssu.ac.kr
Yoon, Joonsung	Associate Professor	Ph.D. (New York Univ.)	Media Aesthetics, Media art	jsy@ssu.ac.kr
Kim, Kyujung	Associate Professor	D.A. (New York Univ.)	Media art, Physical Computing	kyu@ssu.ac.kr

Lim, Chan	Associate Professor	M.F.A. (San Francisco Art Institute)	Film	chanlim@ssu.ac.kr
Lee, Kang-Hee	Assistant Professor	Ph.D. (KAIST)	Media Robotics	kanghee.lee@ssu.ac.kr

Department of Interior Design

03

Engineering

The Department of Interior Design aims at training experts who can predict and propose future life through creative concepts for interior design based on various educational experiences. By connecting in-depth scientific theories to practical designs and plans, the Department runs systematic researches on interior, plastics, and environments as well as education. For this, we carry out various researches including interior design and planning, interior plastics, space theory and history, interior environment, re-modeling, space environmental design, space media design, space brand plan and marketing in parallel.

AREAS OF SPECIALIZATION

Space & Environment Design Lab;

The Lab covers researches concerning every space environment which comes up frequently in daily life and non-daily life and in public spaces. It investigates new thinking methods which integrate components in space through combining other fields like economy, culture, literature, arts, music, and dance and performs experimental projects which can embody a plan and design based on systematic exploration of theories.

Through the course, spatial environment elements are observed in urban life and nature, and thus presented in well-recognized space designs. The designs also adopt marketing investigating methods by analyzing customer-focused psychology in order to supply the energy to sustain healthy life in long-remembered spaces.

Space Media Lab :

The Lab proposes the research on a space for a harmonic Life which brings human-beings, society and environments together by analyzing multilateral shapes in Life. Also, it advances practical research which plans and embodies a space in terms of integral points through multi-studies research and analysis such as central behavior space design space design adopting various medias, sentimental experimental spaces considering space marketing, and so on.

Interior design is a kind of junction between body and space, as well as between culture and space. Inner-and-outer space can be delineated by these two substances. In this context we try to study the meaning and method of interior design existentially and culturally. For this aim, our lab holds intensive theory seminars and field trips. Also, lab students are encouraged to participate in many design competitions.

PROGRAM OF STUDY

The Department of Interior Design offers effective design studies as follows:

Lectures and Seminars: We offer lectures and seminars in parallel in order to teach various design theories.

Studio:

Practice-focused courses are provided in studio classes. All students complete assigned design projects with one-on-one conversations and discussions between an instructor and the student. Studio courses are crucial as core subjects in the Department of Interior Design because they are the most effective way to combine design practices and related theories.

Fieldwork:

The Department of Interior Design offers chances for students to visit famous interior design shops in Seoul or elsewhere and lets students experience real designs. Through various fieldwork, students can learn theories with necessary on-the-spot senses. Moreover, we visit interior design places under construction to improve experimental knowledge.

Professional presentations:

Students are expected to present their academic works in conferences, after learning the necessary skills from the coursework of the Department. It is one of our traditional ways to train students for confirming their academic passions and confidence in themselves and to establish human networks between students and other colleagues in the field.

Department of Digital Broadcasting

The Department of Digital Broadcasting offers a variety of majors that provide competitive educational programs and research opportunities. We have excellent various academic fields and offer M.S. course which is exciting and academically challenging.

03

Engineering

AREAS OF SPECIALIZATION

- MSc in Digital Broadcasting Engineering

The graduate program in the Department of Digital Broadcasting is designed to give students the opportunity to study fundamental theory of digital broadcasting and to train students as competent professionals in the field of digital broadcasting.

PROGRAM OF STUDY

Teaching is performed by a variety of lectures and seminars. Assessment is by written examination, assessed coursework, presentation, and a dissertation.

Departmental
Cooperation Program
Departmental
Cooperation Program

Program in Culture Contents

The primary goal of the Department of Culture Contents is to train the necessary human resources in the fields of culture and art and to incubate creative manpower to participate in the development of Digital media industry. The Department coordinates Art and culture by training students for the creative mind as well as the ability to develop digital content and software. In this regard, the Department emphasizes on the interdisciplinary training to integrate digital media, literature, art, and design. The department is guided by the two policies; the development and the practice of cultural theory and contents methodology and the creation of new digital media by learning basic media theory and methodology.

AREAS OF SPECIALIZATION

Culture Contents

Common areas

Culture and arts

Digital Media Sector

PROGRAM OF STUDY

Acquisition of core knowledge is achieved mainly through lectures and seminars, practical classes and demonstrations. More specialised and detailed knowledge is gained through preparation for coursework assignments, working on projects and theses, and through reflection and discussion in seminars. Assessment is principally through mid-term and end-of-semester written examinations and coursework assignments (mainly Culture Contents based media and art presentations) which assess deeper understanding and extended argument, as well as more specific knowledge and approaches. All graduate students must pass all required courses and qualify examinations and write and defend a master's thesis for Master degree and Ph.D thesis for Ph.D. degree. Each thesis is evaluated by more than three faculty members, at least one of whom is not an instructor in the program.

Program in Korean Studies

Soongsil University, Korea's first modern university, prides itself as an academic institution that strives to maintain Korea's cultural traditions. In order to maintain its leading role of upholding traditional Korean culture and scholarly pursuits, the Graduate School of Soongsil University has opened its own Korean Studies Program. This program offers courses in Korean history, philosophy, language, and culture with the hope of fostering a better understanding of Korea and its people both at home and abroad.

The Korean Studies Program is intended for Korean and international students alike. The multinational make-up of the student body naturally encourages and facilitates the scholarly and cultural exchange of ideas between a host of nations.

AREAS OF SPECIALIZATION

A comprehensive study about Korea and the knowledge one can attain from such a study. Humanities and Social science research fields are also integrated in studies on Korean Society and culture. In addition, to promote mutual understanding and to exchange aims, the international community is also considered.

PROGRAM OF STUDY

The program is guided by enthusiastic and competent faculty members drawn from diverse fields who work closely with students both as advisors and mentors. Graduates of the Korean Studies Program go on to pursue doctoral degrees, conduct research with faculty members or find fulfilling careers working as professionals with international exchange programs/institutions related to Korea.

COURSES

Common Courses

Introduction to Studies of Korean Language
Studies in the History of Korean Literature
Studies in the History of Korean Philosophy
Studies in the History of Korean Historiography

Korean Linguistics and Literature

Introduction to the Studies of Korean Literature
Studies in Contemporary Korean Language
Studies in Middle Korean Language
Studies in Modern Korean Language
Studies in Old Korean Language
language in written form using Chinese characters.
Studies in Korean Language Teaching Method
Studies in Korean Grammar Teaching Method
Studies in Korean Grammar Teaching Materials
Studies in Sino-Korean Literature
Studies in Eastern Asian Literature
Studies in Korean Oral Literature
Studies in Korean Poetry
Seminar in Korean-Chinese Comparative Literature
A comparative examination of Korean and Chinese literature.
Seminar in Korean-Japanese Comparative Literature
A comparative examination of Korean and Japanese literature.

Program in Korean Studies

Korean Philosophy

Studies in Korean Buddhist Philosophy
Korean New Confucianism
Philosophy of Ancient Korean
Philosophy of Toegye and Yulgok
Seminar in Korean Practical Learning
Confucianism & Christianity in Korea
The Methodology of Eastern Philosophy
Seminar in Civil Movement of Contemporary Korea
Seminar in Korean Aesthetics
Comparative Studies in Eastern and Western Ethical Theories
Seminar in Contemporary Korean Thoughts

Korean History and Society

Studies in Korean Archaeology
Studies in Ancient History of Korea
Koryo Dynasty Studies
Chosun Dynasty Studies
Studies in Modern History of Korea
Studies in Contemporary History of Korea
Studies in the History of Korean Fine Arts
Studies in the History of National Independence Movement
Studies in the History of Korean's Struggles Against Foreign Country

Program in Sports Information Technology

Nowadays, the importance of information technology in sports is continuously increasing, in the fields of sports instruments, sports wear, sports broadcasting, sports health management, sports data analysis, etc. In addition, IT is being adopted in sports management and a lot of digital content, as well. The Department of Sports Information Technology aims for educating talented professionals in these fields, where the convergence of sports and information technology takes place.

AREAS OF SPECIALIZATION

→ **Master of Science in Sports Information Technology**

Doctor of Philosophy in Sports Information Technology

The graduate program in the Department of Sports Information Technology provides both Master of Science and Doctor of Philosophy in Sports Information Technology. Prospected students can have any undergraduate major, but sports or IT backgrounds are expected. The students will be trained so that they can act as professionals in the emerging job market.

PROGRAM OF STUDY

Teaching in this field of convergence will be carried out by professors from various departments. Professors in the department of Sport of All Studies, Electronic Engineering, Computing, and Digital Media will cooperate to educate the graduate students. The students will also have chances to participate in the research projects supported by the government or industry, so that they can build up their professional careers.
